

# 2014 Development Report

--- With Updated Census Demographics

Sesquicentennial  
Edition

*Demographics*

*History*

*New Construction*

*Redevelopment*

*Growth Trends*

*Subdivisions*

## In This Edition:

This report provides a summary of major development activities in the City between January and December of 2014. Information gathered serves as a helpful planning tool for future development, and gauges conditions under which development occurs. Where appropriate, geographic information is provided to help facilitate a better understanding of the way the community grows and changes over time.

Also included in this report are analyses of growth trends in the past decades as well as complete listings of major developments and subdivisions in the City. In addition, this report includes updates to the basic demographic statistics from the Census Bureau's American Community Survey (ACS).

Following decades of fast growth, Lee's Summit has witnessed a dramatic slowdown in new construction over the last few years due to the downturn in the economy and the housing market that affected the entire country. However, compared to other communities in the Kansas City Metropolitan area, Lee's Summit continues to be a relatively strong market for new construction and redevelopment/infill development.

In the past four years, Lee's Summit has experienced a modest but steady recovery in its new housing construction and this trend continued in 2014.

This report provides a summary of major development activities in the City of Lee's Summit between January and December of 2014. Information gathered serves as a tool to plan and project future growth, as well as understand the current state of the City.

2014 represented an exciting year for Lee's Summit as it continued to see increasing levels of growth following a period of reduced development activity subsequent to 2007. Continued interest in both redevelopment and new development suggests that 2015, the sesquicentennial of Lee's Summit, will see the City continuing to be one of the strongest markets in the metropolitan area.

# City at a Glance

**65.87**

Council Districts

**4**

School Districts

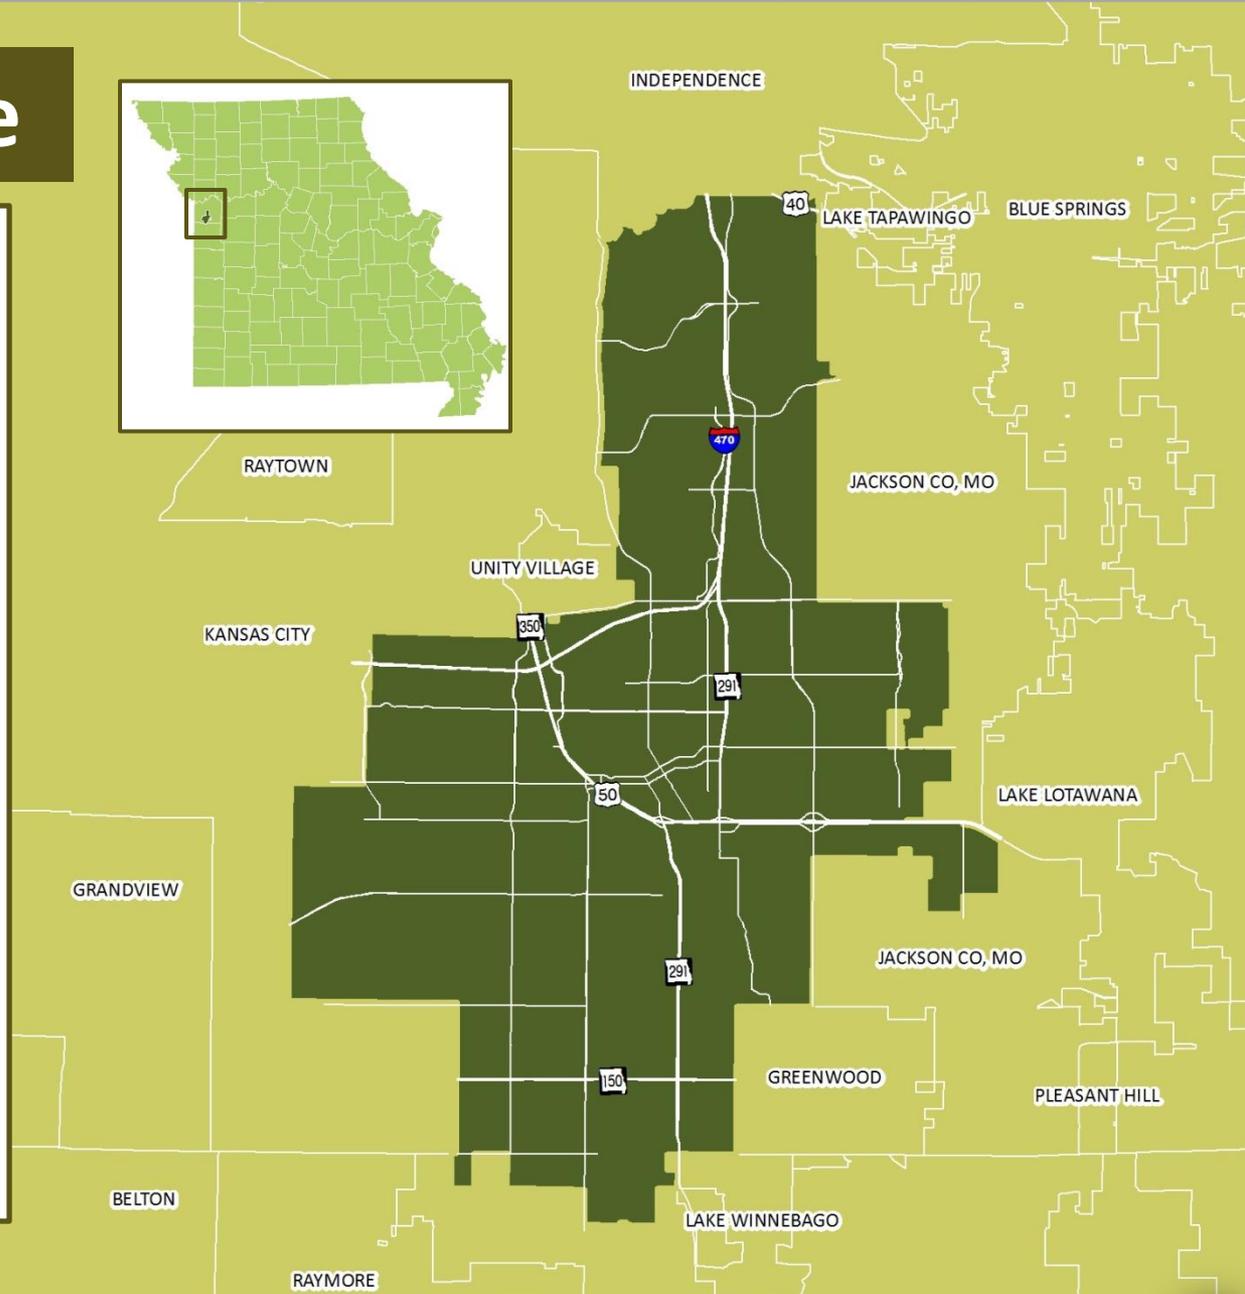

**5**

Highway Interchanges

**14**

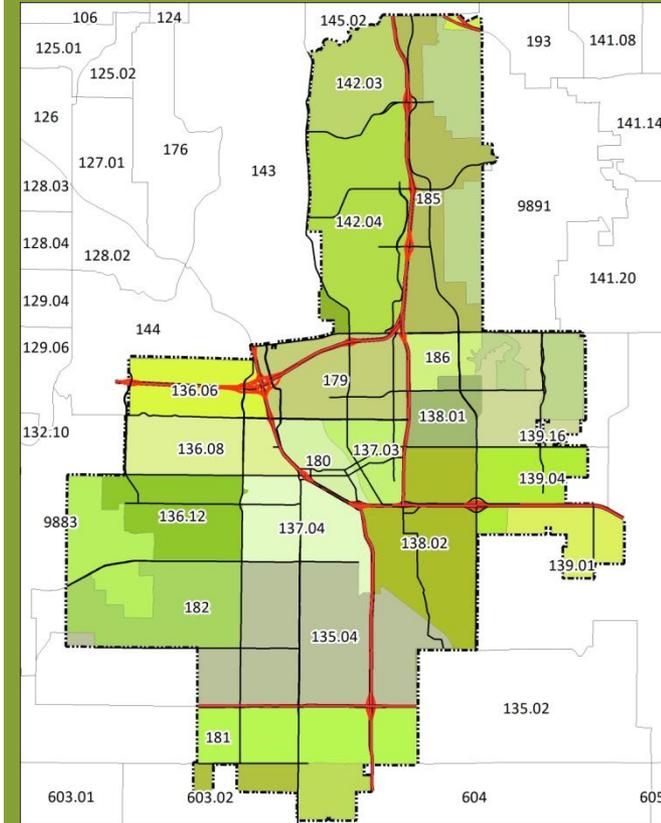

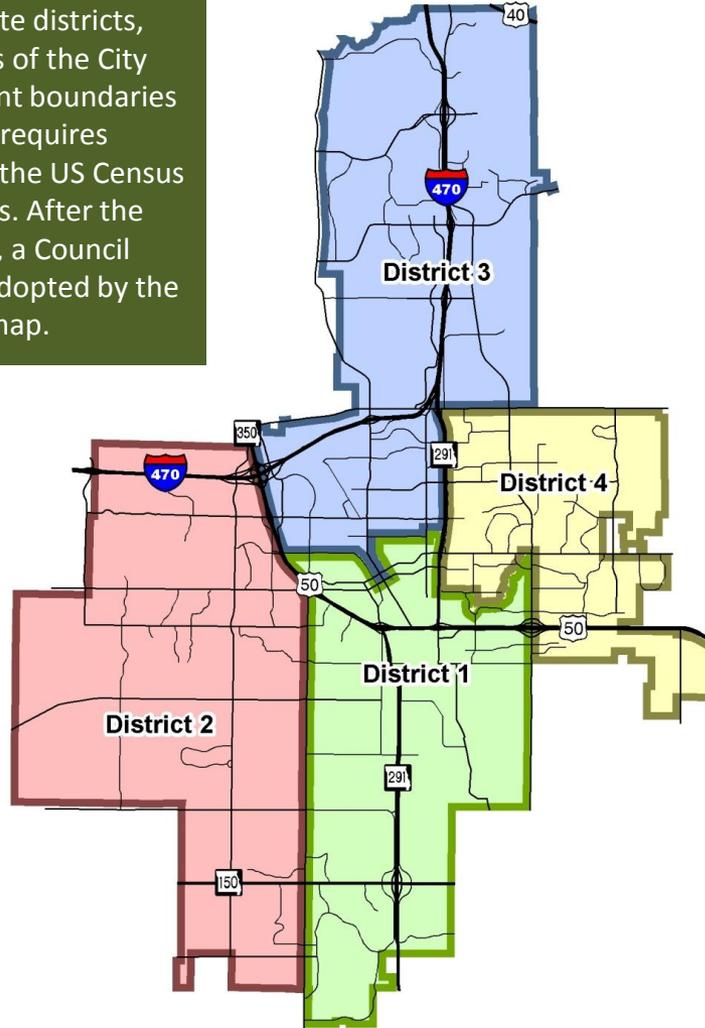

# Political & Statistical Boundaries

## City Council Districts

The City is divided into four separate districts, each represented by two members of the City Council. This map shows the current boundaries of these districts. The City Charter requires redistricting every ten years when the US Census Bureau releases new census counts. After the 2010 Census was released in 2011, a Council Redistricting was completed and adopted by the Council, which is reflected in this map.

City Council District Representatives	
Mayor	Randy Rhoads
District 1	Rob Binney & Diane Forte
District 2	Trish Carlyle & Allan Gray
District 3	Derek Holland & Diane Seif
District 4	Bob Johnson & Dave Mosby

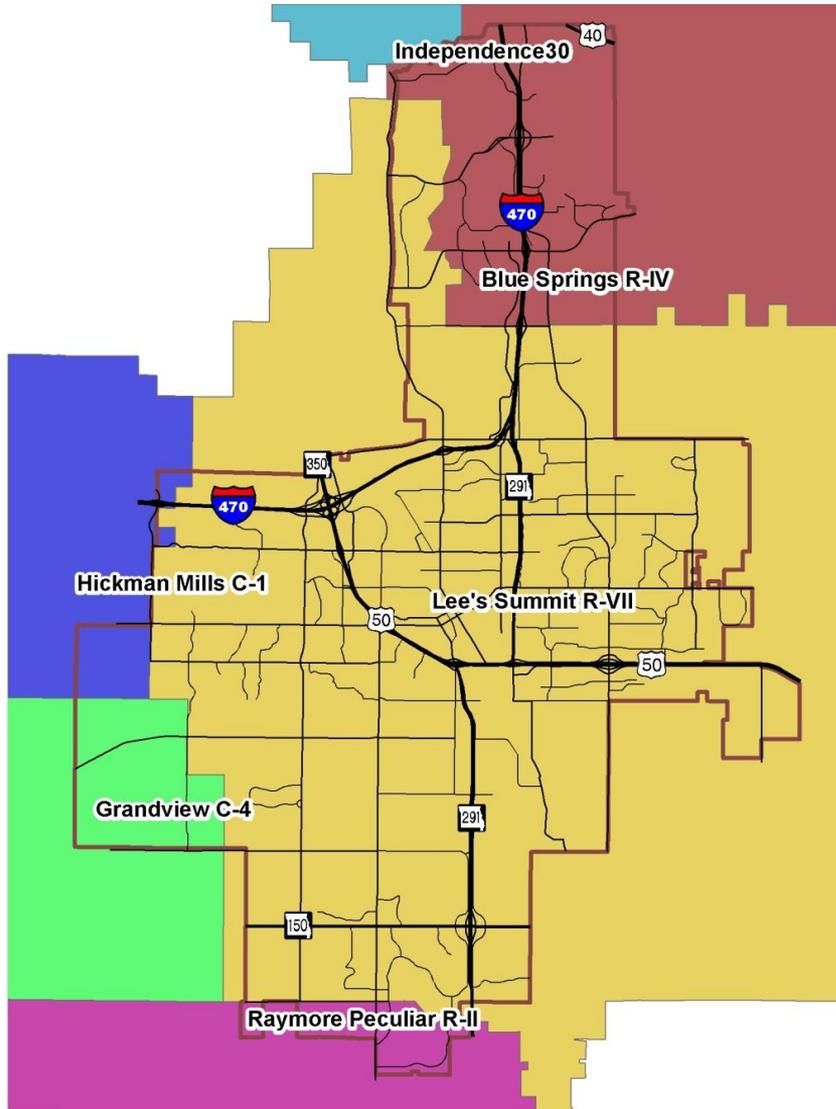

## 2010 Census Tracts

Census tracts are geographic units delineated by the US Census Bureau for the purpose of the census. These tract boundaries normally follow visible features such as rivers and streets. City limits are not normally used as census tract boundaries unless they overlap with such physical features. This map illustrates the 2010 census tracts that are partially or entirely within the City limits.

# Public School Districts

Although Lee's Summit is served by five public school systems the Lee's Summit R-VII School District has the largest service area in Lee's Summit, as shown in the accompanying map and charts. The statistics provided below summarize the coverage area of each school district within the city limits as well as its relative percentage share.

### Lee's Summit R-VII School District Statistics

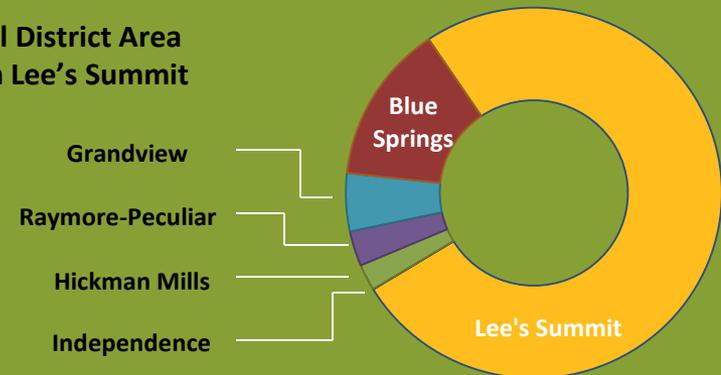

Graduation Rate	94.10%
High School Graduates Attending College	80.40%
Student-Teacher Ratio	15
Attendance Rate	95.70%
Composite ACT score (vs. National Average of 21)	23.5

\*Statistics provided by the Missouri Department of Education 2013

### School District Area within Lee's Summit

School District	Square Miles	% Total Area
Lee's Summit R-VII	50.51	76.69%
Blue Springs R-IV	9.23	14.01%
Grandview C-4	3.37	5.12%
Raymore Peculiar R-II	1.56	3.09%
Hickman Mills C-1	1.17	2.32%
Independence 30	0.02	0.03%

## History of Change

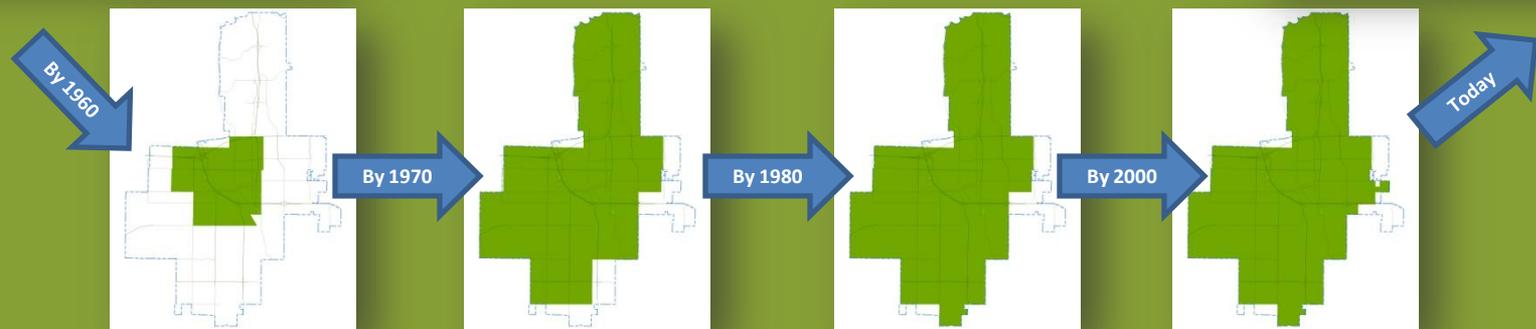

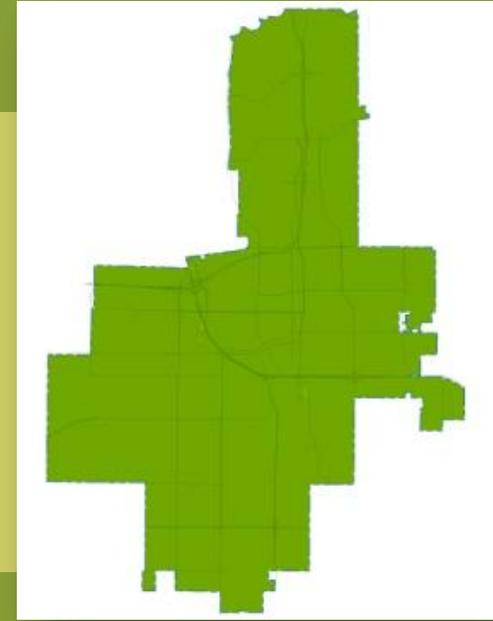

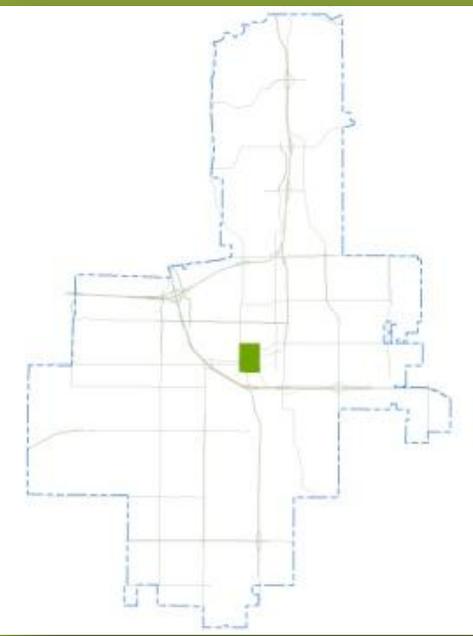

# History of City Boundary Growth

1865

Lee's Summit has grown significantly by land area since its founding in the 1800's. The series of maps here depict graphically how the City has expanded its boundaries over a period of 150 years.

2014

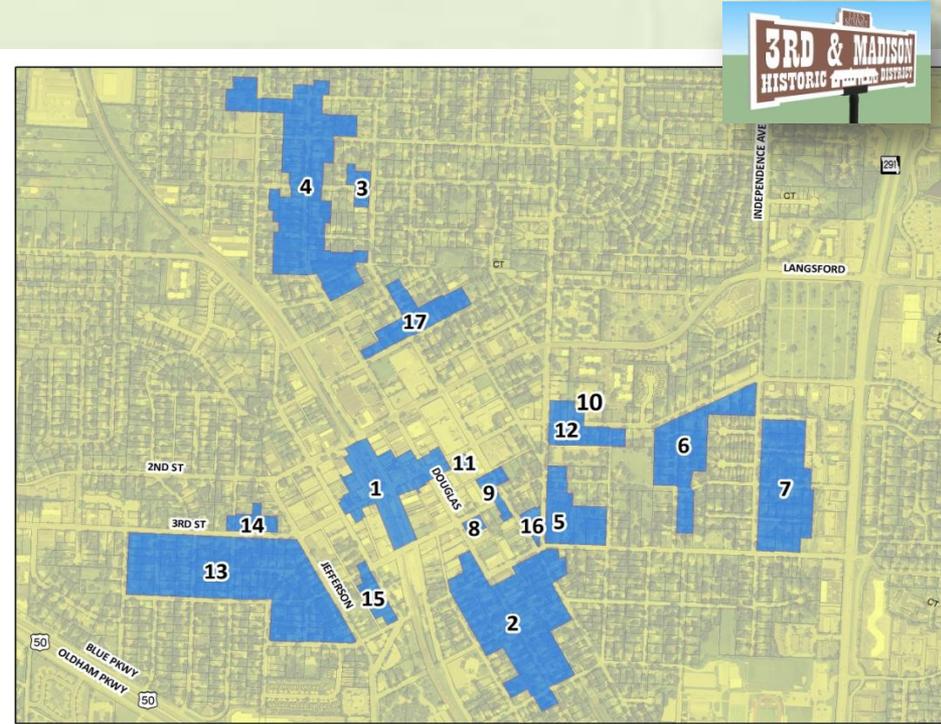

# Lee's Summit Historic Districts and Landmarks

Based on the United States National Park Service, "The National Register of Historic Places is the official list of the Nation's historic places worthy of preservation. Authorized by the National Historic Preservation Act of 1966, the National Park Service's National Register of Historic Places is part of a national program to coordinate and support public and private efforts to identify, evaluate, and protect America's historic and archeological resources."

Lee's Summit has a rich history that the community treasures dearly. Up to today, there are 19 districts and landmarks in the City listed on the National Register. The City's Historic Preservation Commission, the Lee's Summit Historical Society and local property owners have played an important role in having them registered.

Map #	National Register Historic District and Landmark	Date Listed
1	Lee's Summit Downtown Historic District	8/17/2005
2	Howard Neighborhood Historic District	7/3/2007
3	NE Forest Ave. and NE Green St. Residential Historic District	8/27/2008

  - 1980 to 1999
  - 2000 to Present
  - Present City Boundary

**Howard Cemetery (1867):** Named for one of the early developer's of Lee's Summit, William B. Howard, the cemetery is the sight of interment of many notable individuals from the Border and Civil War periods.

**Longview Farms (1914):** Constructed for lumber baron Robert A. Long, it was once known as the "World's Most Beautiful Farm."

**St. Paul's Episcopal Church (1884):** Built on property donated by William B. Howard, the church's construction was largely funded by the 7-year efforts of three women who also oversaw plan selection and construction.

**Lee's Summit Depot (1905):** Built on the site of the original station, placed as a midpoint between Kansas City and Warrensburg.

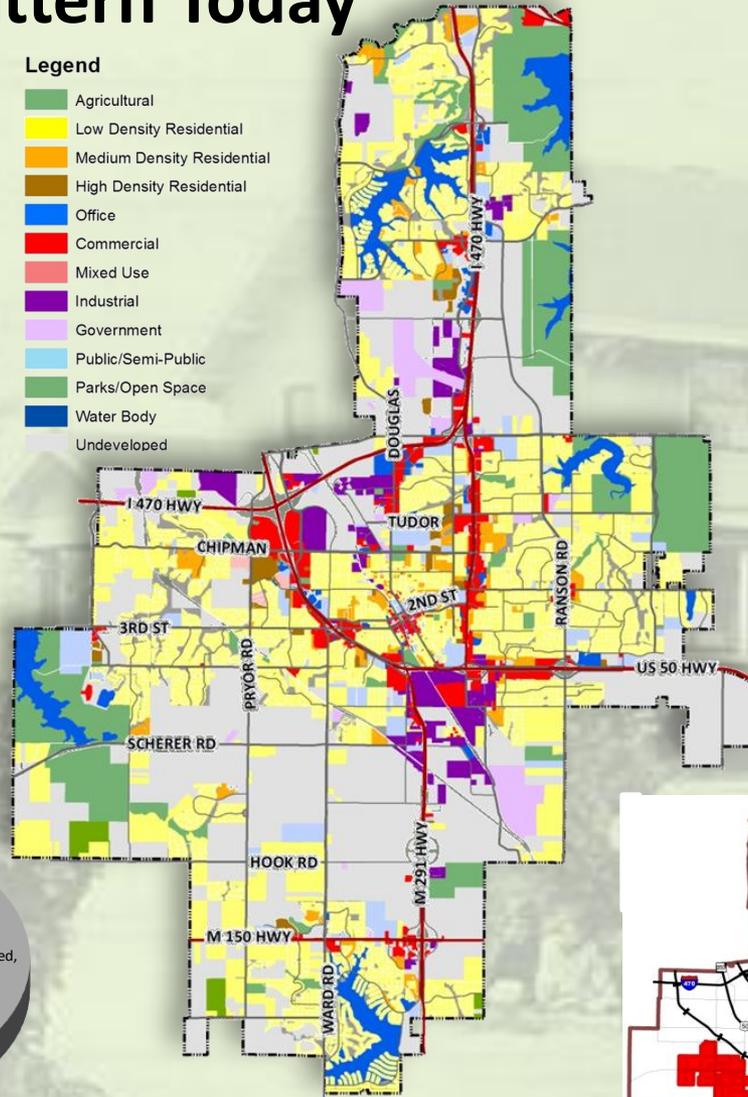

# Land Use Pattern Today

The map of the existing development and land use types helps us understand how the community has been developed and how different human activities relate to each other geographically. The current land use map shows the types of land use on each property as of December 31, 2014. It should be noted that some properties are fully utilized for the type of land use identified, while others may not be. This means that these properties have a potential for additional development in the future.

# Annexations and Rezoning in 2014

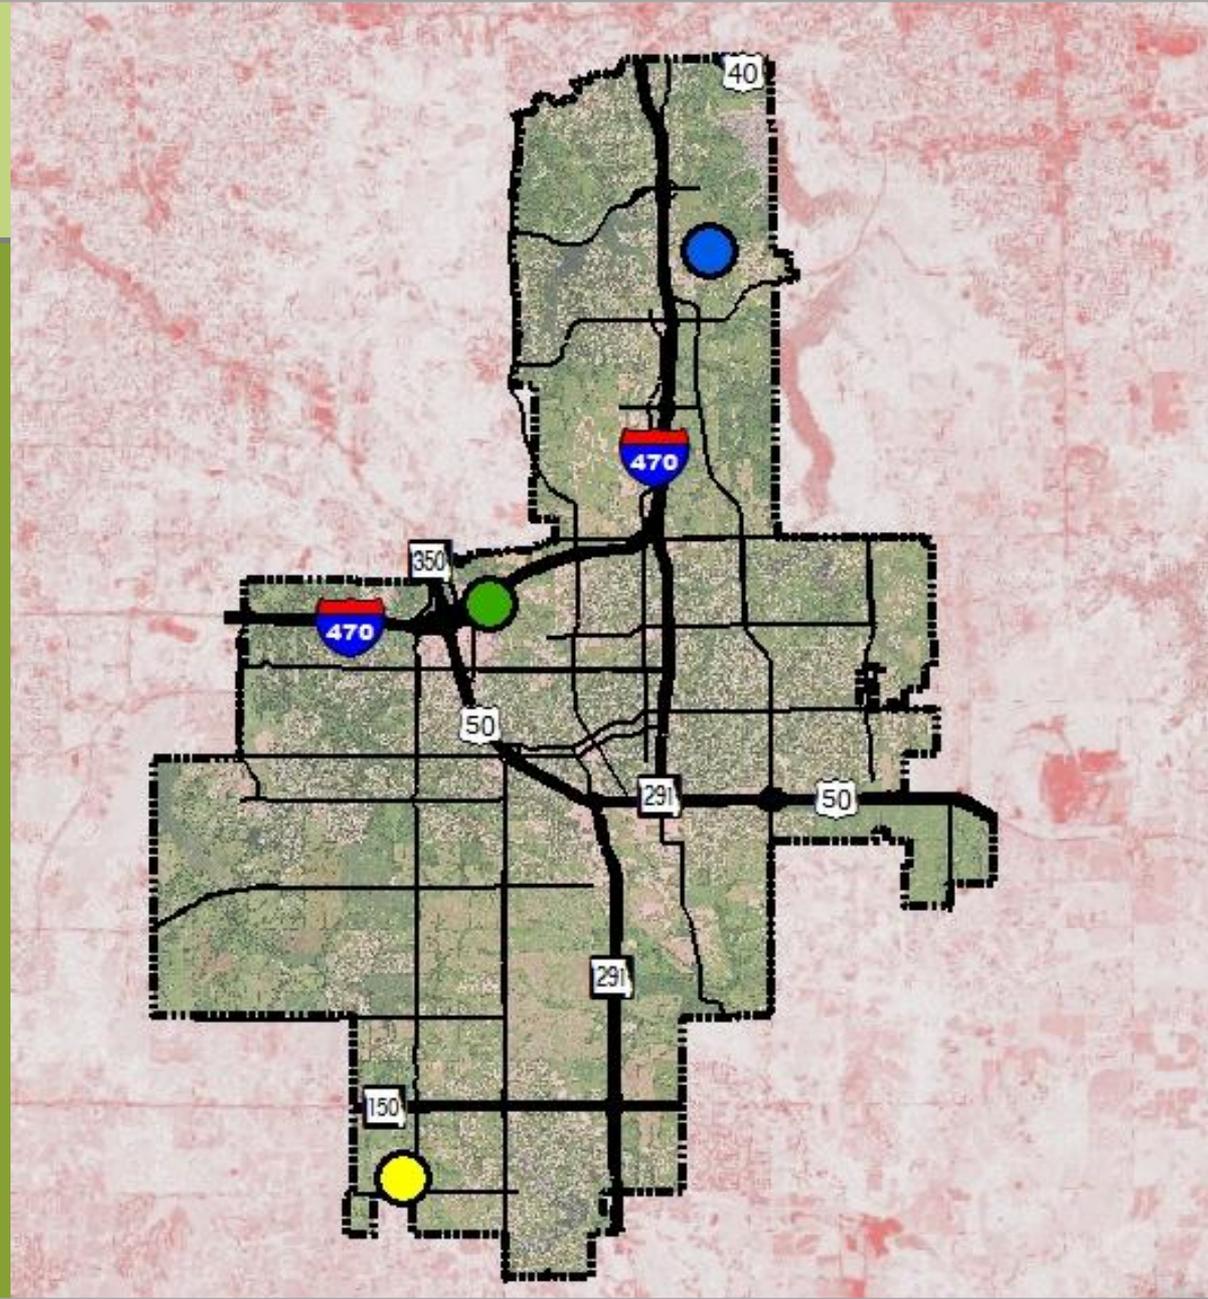

## Annexations:

In 2014, no annexation was requested or approved by the City of Lee's Summit.

## Rezoning:

Three rezoning requests were approved by the City Council in 2014. The map to the right shows the locations of approved rezoning cases.

- Ordinance #7459 – 4350 SW Pryor Road; a change in zoning classification from AG to RDR
- Ordinance #7496 – 1301 NW Ward Road; a change in zoning classification from PI to PMIX
- Ordinance #7502 – Portions of Dalton's Ridge, 2<sup>nd</sup>, 4<sup>th</sup>, and 5<sup>th</sup> plats; a change in zoning classification from R-1 to RP-1

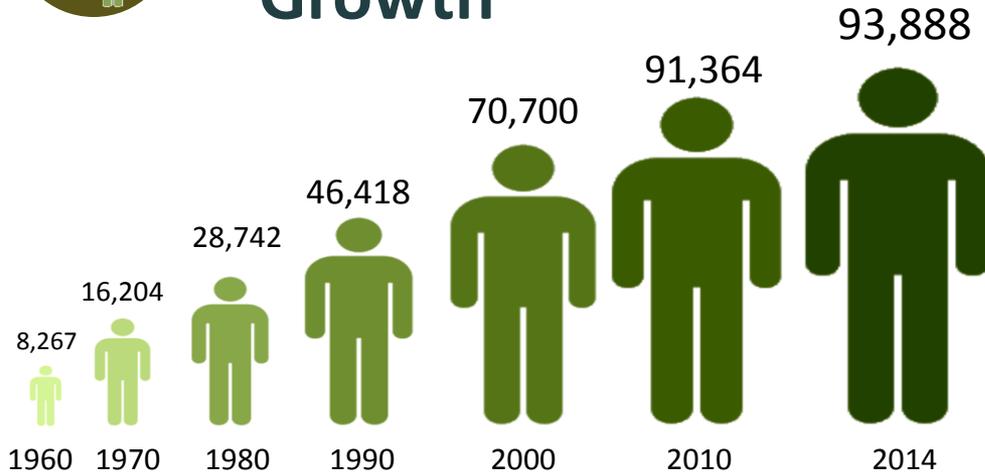

# Population and Housing Growth

# Population Growth

Lee's Summit has experienced remarkable growth over the course of its history, particularly since the 1960s. Although this trend has lessened considerably since 2007, the City's growth rate is again rising. The table to the right indicates population and percentage growth in Lee's Summit from 1960 to December 31, 2014.

In April 2010, the U.S. Census Bureau conducted its decennial census survey to calculate demographic figures throughout the country. This survey along with updated data from the 2013 provided official population counts based on geography that were then used here to estimate population totals for the years to follow.

The figures shown for the current year were calculated using 94% of total new dwelling units between July 2013 and June 2014. This is done in an effort to account for vacancy rates in the City and construction time. The number of new units is then multiplied by the 2.7 persons per household average as given by the 2013 ACS 5-year average to estimate a 2014 annual population change close to 800.

Year	Population	Percentage Growth	Year	Population	Percentage Growth
1960	8,267	N.A.	1990	46,418	4.32%
1961	9,186	11.11%	1991	47,995	3.40%
1962	10,907	18.74%	1992	49,712	3.58%

1988	42,681	7.28%			
1989	44,494	4.25%			

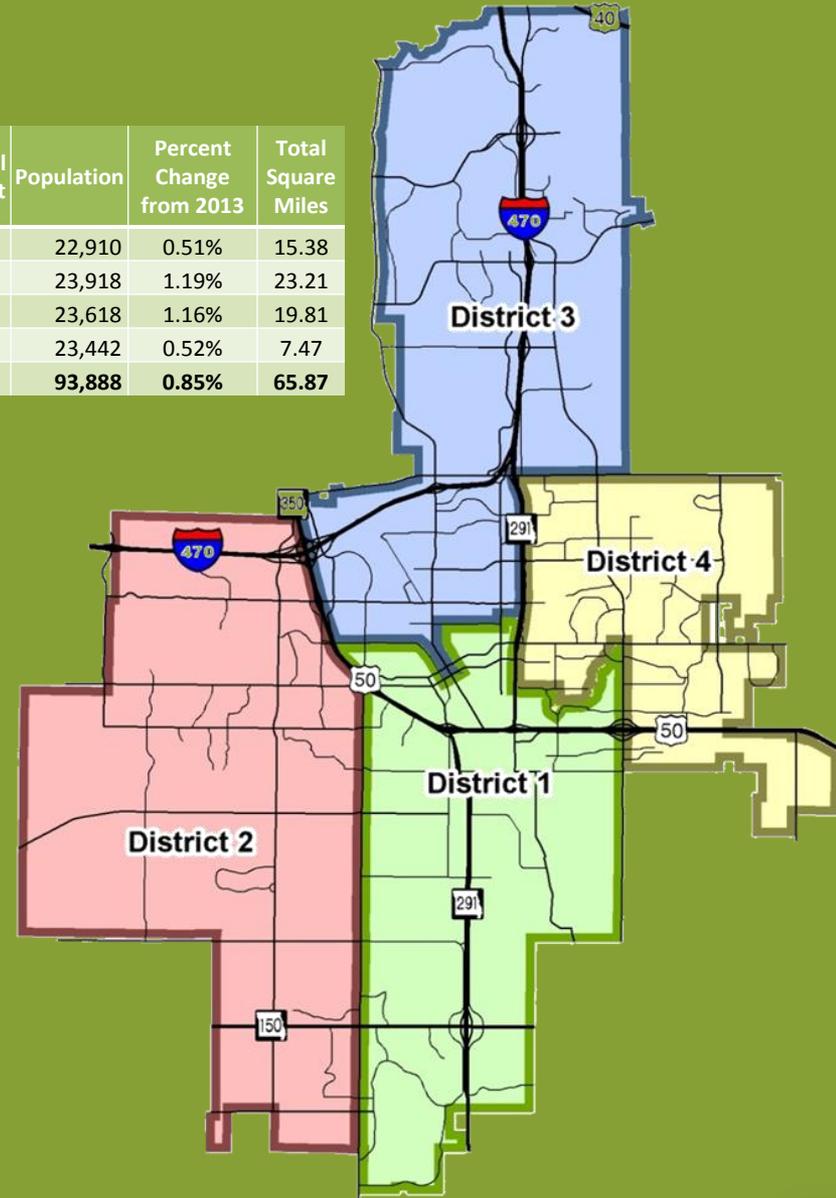

# Population by Council District

This page provides a breakdown of population by City Council Districts within the City. Following the redistricting of City Council based on the 2010 Census population data, the population became evenly distributed among the four districts. Since then, the City estimates population growth annually using the City's residential building permit and housing demolition data with consideration of the current residential vacancy rate and average household size. During 2014, the estimated population growth was 796.

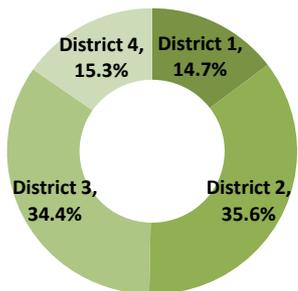

The City witnessed a modest increase in residential permits as compared with 2013, a positive sign that the housing market continues to recover. While these permits were again largely for single family homes, more than 40% of units built were in multi-family structures. Just as in 2013, residential building permits issued indicate a stronger growth in District 2 than other districts, although District 3 is a close second.

As with population growth, residential permitting along with a vacancy rate of 6% and a household size of 2.7 were used to calculate the number of persons added to the City's population.

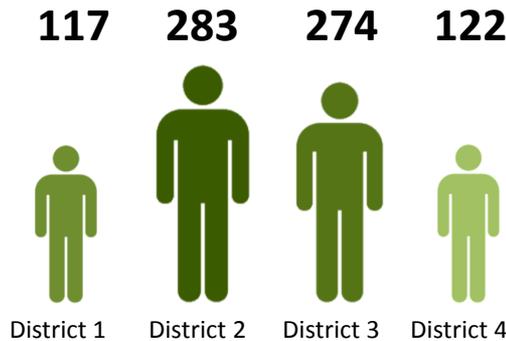

Council District	Population	Percent Change from 2013	Total Square Miles
1	22,910	0.51%	15.38
2	23,918	1.19%	23.21
3	23,618	1.16%	19.81
4	23,442	0.52%	7.47
<b>Total</b>	<b>93,888</b>	<b>0.85%</b>	<b>65.87</b>

1987	16,245	7.5%			
Total % Growth 1960-2014				1227%	

\*Number of dwelling units reported here represents true cumulative total based on the actual building permits issued annually since 1960. However, the 2010 Census reported number is higher. For the purpose of this report, this discrepancy is ignored.

## Cumulative Housing Growth Since 1960

Lee's Summit has been one of the fastest growing suburban communities in the Midwest for several decades. The steady rate of growth lasted until about five years ago when the national housing market collapsed due to the fall of the mortgage lending industry and decline of the economy. The housing industry is still struggling today due to the current state of the economy, even though there have been signs of housing market recovery.

The table to the left provides cumulative numbers of housing units permitted to be built in the City since 1960 with percentage growth rate as compared to the previous year. As can be seen, the percentage growth in housing units permitted dropped to the lowest levels starting in 2009, and has since begun to rebound.

# History of Residential Building Permits

Housing Permits Breakdown by Type of Structure									
Year	Single-Family	Duplex	Multi-Family	Units Per Year	Year	Single-Family	Duplex	Multi-Family	Units Per Year
1960	286	10	4	300	1988	633	38	72	743

The table to the left provides annual building permits by residential type. Building permits are issued prior to structures being constructed and occupied, so the number of housing units permitted does not represent the number of housing units added to the existing housing stock at the time of permit issuance.

A dramatic drop in annual housing permits issued occurred in 2008, and the number of permits issued has been regaining energy in recent years. Permit issuance has steadily increased through 2014. However, there has not been much multi-family residential activity during that time period until 2014, with the construction of an apartment complex - Residence at New Longview.

# Major Single-Family Residential Activities by Subdivision in 2014

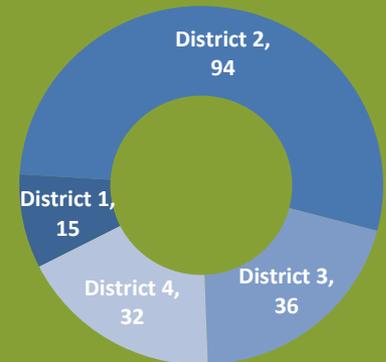

While Lee's Summit's residential areas are already made up of numerous subdivisions, ranging in size from a handful of units to several hundred, there are many more in development.

This table is a selection of those that applied for the most permits in 2014. Of the 42 subdivisions that received permits 2014, the 16 below represent almost 70 percent of the 321 single-family housing permits issued. Perhaps unsurprisingly due to the availability of land, the areas of largest single-family housing development are on the periphery of the City's existing infrastructure.

Map Number	Subdivision	Added Units	Council District
1	Belmont Farms	11	1
2	Brooks Farm	16	1
3	Clubhouse Cottages of Lakewood	8	3
4	Dalton's Ridge	9	3
5	Eagle Creek	30	2
6	Fields of Highland Park	5	4
7	Fountains at Raintree	11	1
8	Highland Meadows	11	2
9	Kensington Farms	6	2
10	Legacy Wood	27	4
11	Madison Park	8	2
12	Park Ridge	17	3
13	Parkwood at Stoney Creek	34	2
14	Raintree Lake Estates	6	1
15	Siena at Longview	12	2
16	Trails of Park Ridge	9	3

In 2014, there was a general increase in residential development in the Kansas City Metro area. Lee's Summit issued more residential building permits than most comparable cities in the region, behind only Overland Park and Olathe, Kansas.

Since 2010, there has been an overall upward trend in the number of permits issued throughout the Kansas City metro. Although growth in permits issued among the selected cities has declined from 56% to 13% between 2013 and 2014, those issued in Lee's Summit increased by almost 71% year over year.

The Home Builders Association of Greater Kansas City provided the data on this page.

Residential Building Permits for KC Metro 2005-2014

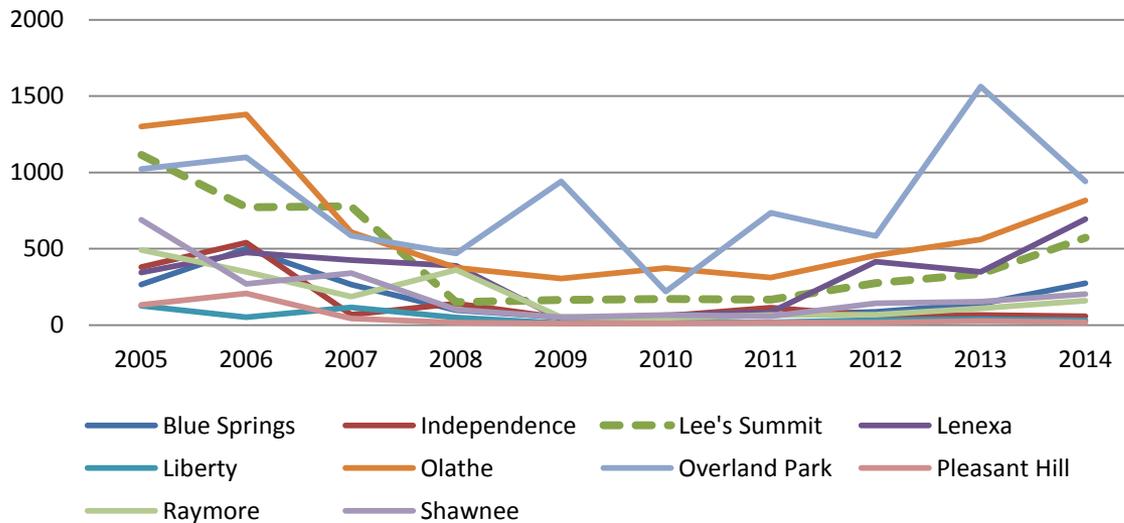

# Recent Housing Market Conditions

Since the burst of the housing bubble around 2007, the downward trend has seen signs of slow recovery for most of the selected cities. The depressed housing market is largely recovering, indicating the slowdown may have passed. The charts included illustrate the housing market tendency for Lee's Summit in particular and in comparable cities in the Kansas City metro area. The recent year housing market shows that multi-family development is picking up speed on the Kansas side, particularly in Overland Park and Lenexa, while the market on Missouri side continues to favor single-family. This explains why the trend lines for Overland Park and Lenexa are spiky while others are a lot smoother.

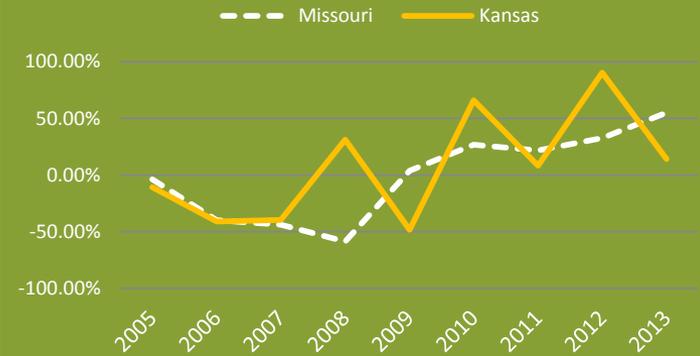

Lee's Summit continues to show signs of steady recovery in residential building permit numbers over the course of 2014. The graphs to the lower right depict the previous 10 years of residential permits issued and the monthly history of residential building permits issued in 2014. Typically, more permits are issued during the spring and summer seasons than during the fall and winter seasons.

It should be pointed out that the housing market is still hard to predict and whether any market improvements we are seeing will continue is yet to be determined.

# Population and Housing Growth Projections

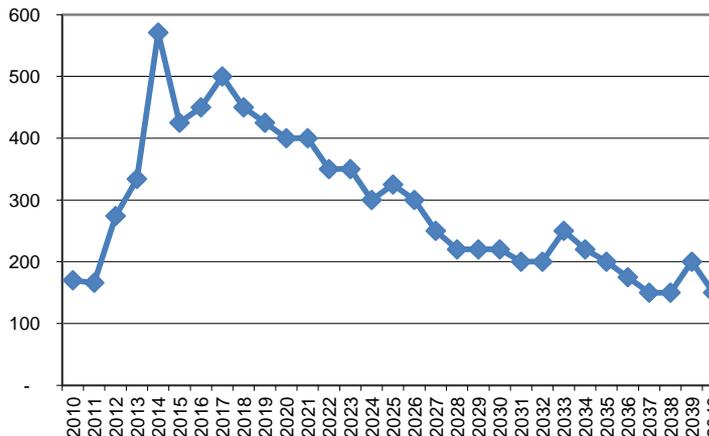

Each year, the City adjusts its population projections for the upcoming decades by closely examining the growth trends. The recent slowdown in economic growth and housing development has prompted a re-evaluation of the City's future growth projections. At this point, it is unclear how the trend will progress. The unsustainable speed of growth in the 1990's and early 2000's has taught us to be more realistic about the future.

It is safe to predict that the market and investment will be more cautious moving forward to ensure success. How differently the market will behave is yet to be seen. This uncertainty adds to the difficulty in projecting future growth. The projections provided on this page should represent a "best guess", given what we know today. These projections will be adjusted every year based on new trend.

Projected Population

\* Population to be added is calculated using median household size and the estimated housing vacancy rate, which are not held constant over time.

## Non-Residential Development

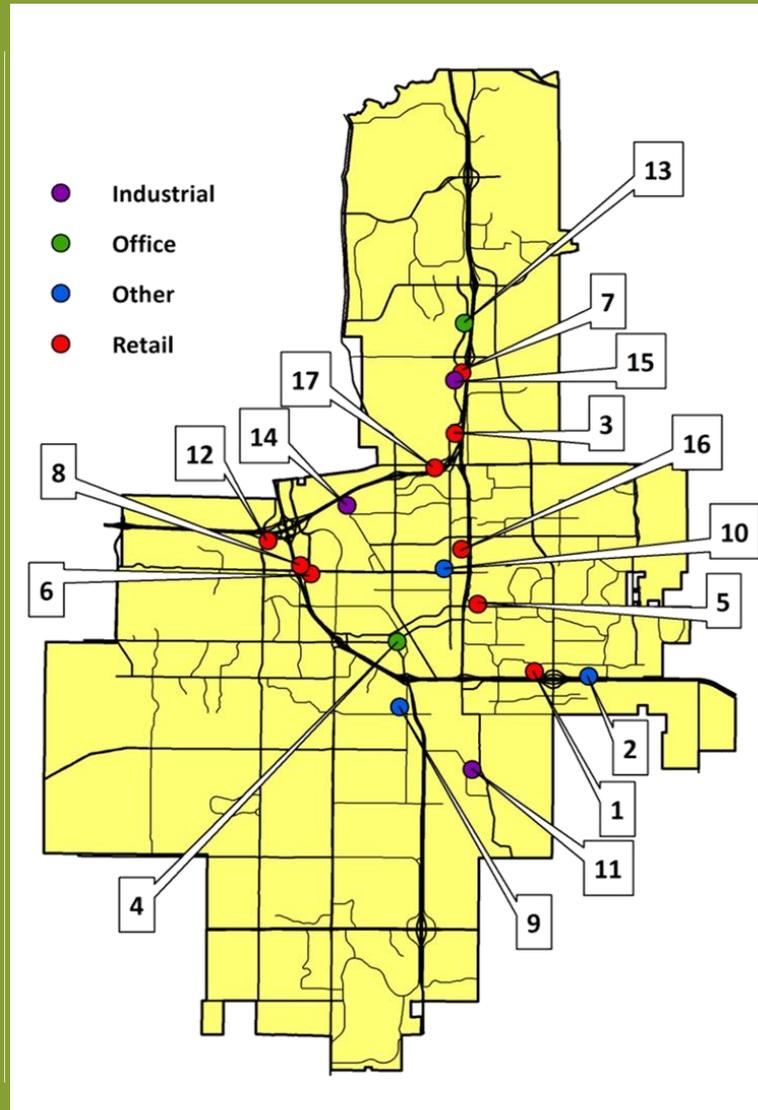

## 2014 Non-Residential Building Permits

The map and table below show the locations of non-residential structure building permits that were issued in 2014. In total, 280,475 square feet of non-residential building space was permitted, almost doubling the 2013 total of 140,315 square feet. The most noticeable gain was felt on the retail side of new construction.

Map #	Name of Development	Address	Building Floor Area (Sq Ft)	Site Acres	CC District	Land Use	Development Type

6	MATTRESS FIRM
7	FRONTIER JUSTICE
8	GREEN LANTERN CAR WASH
12	JACK STACK BARBEQUE
13	CHAPEL RIDGE OFFICE PARK

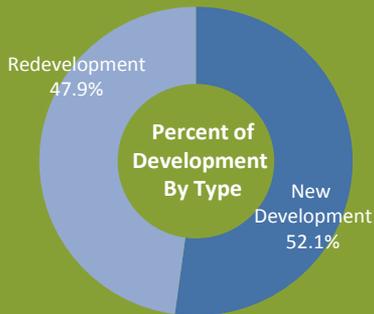

# New Development and Redevelopment Activities

Like many fast growing suburban communities of a metropolitan region, an overwhelming majority of new growth occurs as “green field development”, taking advantage of plentiful undeveloped land at a very affordable cost. It has been proven that it is unsustainable. In recent years, there is a growing trend of making better use of what’s already there through adaptive re-use, redevelopment, infill and expansion of existing facilities. Lee’s Summit started to experience this trend in the past two years. The statistics below demonstrate that redevelopment, infill development and expansion combined almost equals that of new development in terms of building square footage.

2014 Non-Residential Development	Total Building Floor Area (Sq. Ft.)	Percent of Overall Permitted Square Footage
New Development	146,265	52.1%
Redevelopment/Infill/Expansion	134,210	47.9%
<b>Total:</b>	<b>280,475</b>	<b>100.0%</b>

## Mattress Firm and Green Lantern Car Wash (Redevelopment)

Before

After

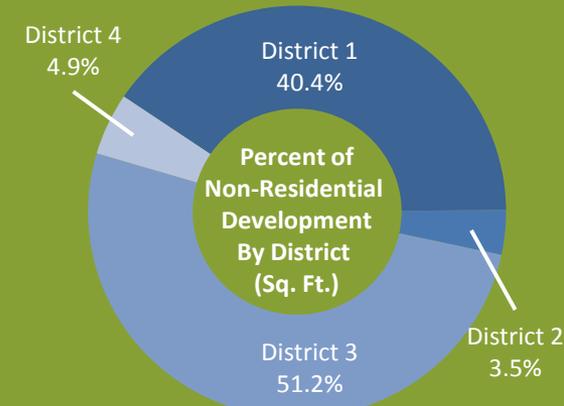

Above: Mattress Firm

These newly renovated properties utilize almost 20,000 square feet of building space that were formerly occupied by the Original Pizza and Italian Restaurant and a car dealership. By redeveloping the property the new tenants take advantage of both the existing structure and the commercially-valuable Chipman Road street frontage.

## Frontier Justice New Development

Frontier Justice is a new development on the northern portion of the I-470 Business and Technology Center. The new building contains 30,000 square feet of both retail space and an indoor shooting range. The site for development is conveniently located near the I-470 and Strother Road interchange.

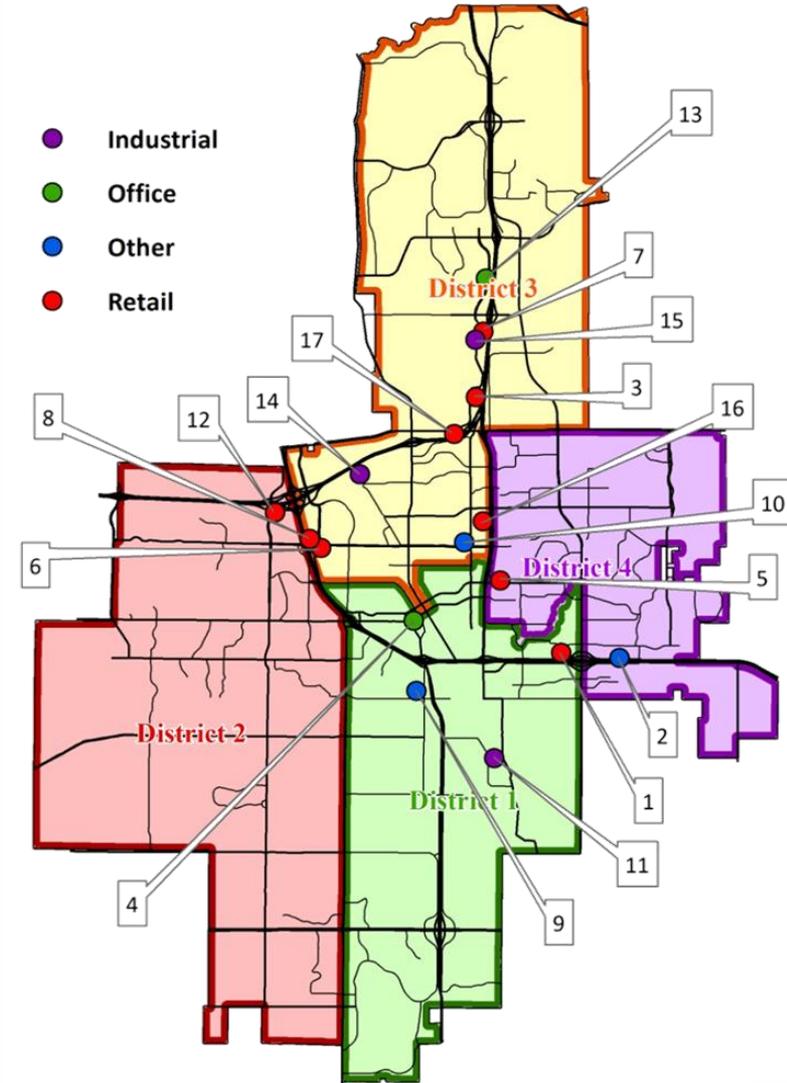

# Non-Residential Building Permits by Council District

Based on square footage, the vast majority of non-residential development activity was located in Council District 3.

Map #	Name of Development	Address	Building Floor Area (Sq Ft)	CC District	Land Area (Acres)	Land Use

## 2014 Non-residential Permits by Land Use

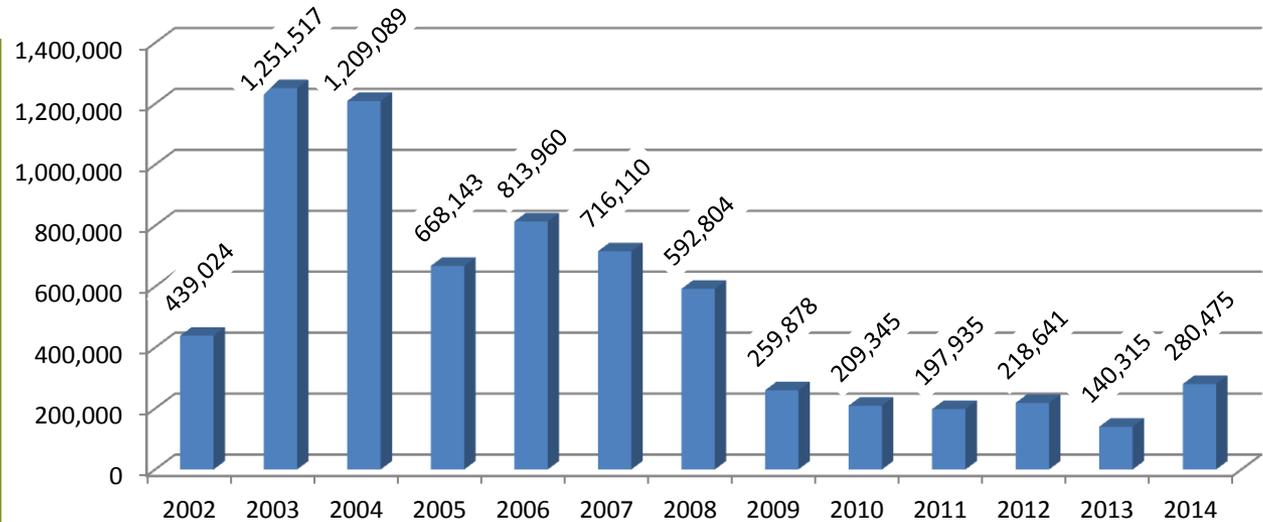

\*Other includes public/semi-public uses.

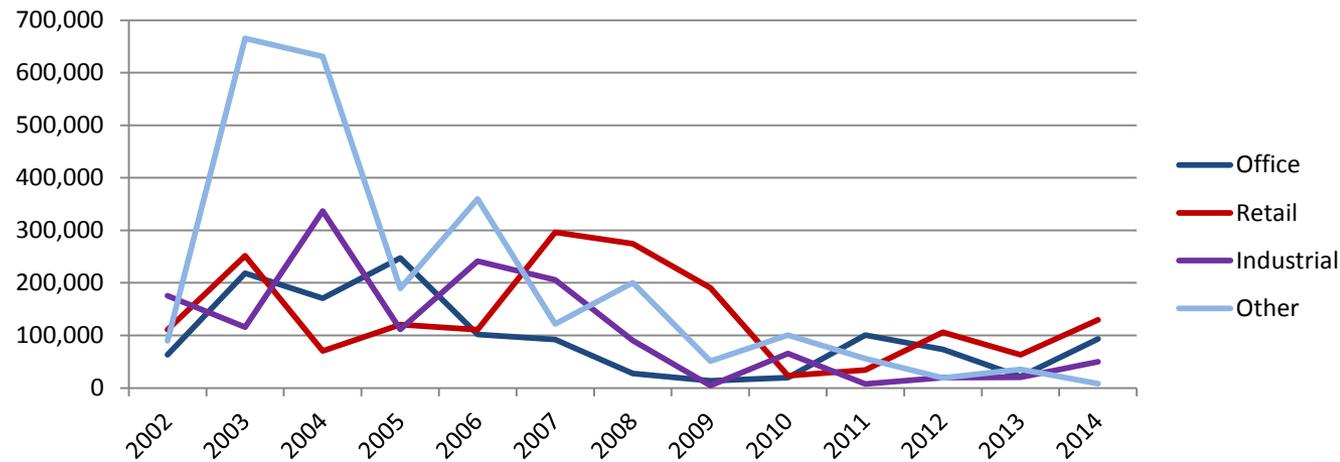

## Non-Residential Permit Yearly Totals by Land Use

Annual Square Footage Totals for Non-residential Permits

Annual Non-Residential Permit totals by Land Use (Square Feet)

During the last decade, non-residential development activities in Lee's Summit enjoyed many years of significant growth until 2009 when these activities started to decline precipitously, as the economic recession began. Development at large has continued since then at half the pace of the years before 2009.

Although the rate of permit issuance has remained below the average level seen during the 2000's, Lee's Summit experienced the best year for building permit activities in the non-residential sector in 2014. Infill and redevelopment activities are starting to pick up, capitalizing on existing vacated or underutilized properties, available infrastructure and lower development cost within well established activity centers. This trend is expected to continue in the years to come. Meanwhile, those actively developing centers will continue to see the remaining platted lots to be filled as the economy continues to improve.

The recent street improvement projects, such as the extension of Tudor Road and Bailey Road west and the re-alignment of Blue Parkway at Colbern Road will boost more development potential.

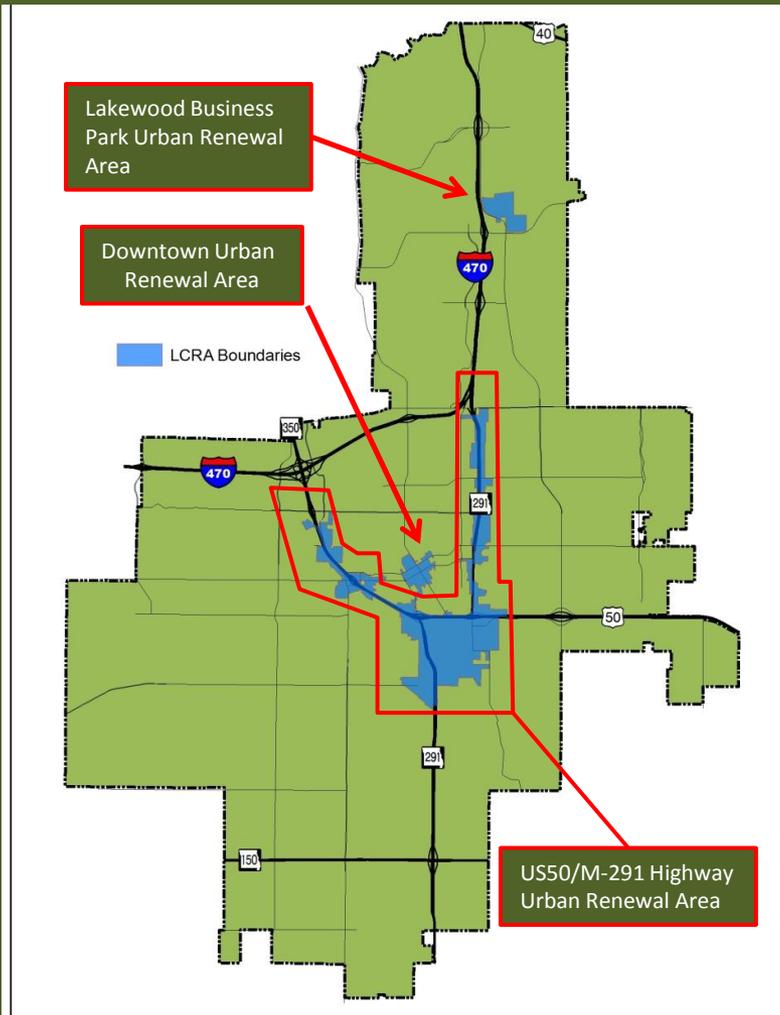

## Redevelopment Strategies

## Land Clearance for Redevelopment Authority Districts

In 1961, a local Land Clearance for Redevelopment Authority (LCRA) was established through approval of Lee's Summit voters. These authorities are authorized by Missouri State Statutes to help local municipalities eradicate blighted and insanitary areas of their community and to encourage redevelopment of real properties, particularly in urban areas. Before a municipality may operate an LCRA, the governing body of the city or county must find 'blight' or 'insanitary' conditions within the identified area, and it must approve a redevelopment plan for the area.

Once established, and with governing body approval, the LCRA may provide the financing of any land clearance or urban renewal project within the redevelopment area through, among other powers, the issuance of bonds or certificates of qualification for tax abatement for property owners within the area.

Within Lee's Summit, there are three areas that have been designated Urban Renewal Areas, as outlined in the map to the left. They include:

- Downtown Urban Renewal Area
- US50/M-291 Highway Urban Renewal Area
- Lakewood Business Park Urban Renewal Area

The oldest of the three districts was designated in 1966 in the Lee's Summit downtown. The Downtown Urban Renewal Area was then reactivated in 2009, following the recommendation of the Lee's Summit Downtown Master Plan. To learn more about LCRA, please visit the City's website at <http://cityofls.net/City-of-Lees-Summit/Boards-and-Commissions/Land-Clearance-Redevelopment-Authority.aspx>

## **Lists of Major Subdivisions**
