

City of Lee's Summit, Missouri

*2009
Development
Report*

LEE'S SUMMIT CITY HALL
220 SE GREEN STREET

Development Trends:
January-December 2009

In This Edition:

This report provides a summary of major development activities in the City between January and December of 2009.

Information gathered serves as a helpful planning tool for future development and gauges conditions, under which development occurs.

In addition, the report presents some commonly requested demographic and geographic information to help facilitate a better understanding of the way the community grows and changes over time.

Lee's Summit has witnessed a dramatic slowdown in construction over the last two years due to the economic crisis and housing market meltdown that hit the entire country recently. However, compared to other markets in the Kansas City Metropolitan area, Lee's Summit continues to be a relatively strong market for new construction. In the meantime, interest in redevelopment has been growing. As the decade closes out, Lee's Summit looks ahead to 2010 with anticipation of development once again gaining momentum.

Quick Stats:

- Located in the Kansas City Metropolitan Area, in Western Missouri.
- Currently encompasses a total geographic area of 65.39 square miles both Jackson and Cass counties, Missouri.
- Estimated population: 93,163 as of January 2010.
- Is divided into **4** City Council Districts and 20 census tracts for the 2000 Census.
- Served by five school districts, with Lee's Summit R-VII serving the majority of the city area.
- Served by major highway corridors including I-470, US 40, US 50, M-291, M-150 and M-350 with 13 interchanges. A new interchange at Strother Rd is under construction.
- Served by the Union Pacific Railroad and Amtrak.

Demographics

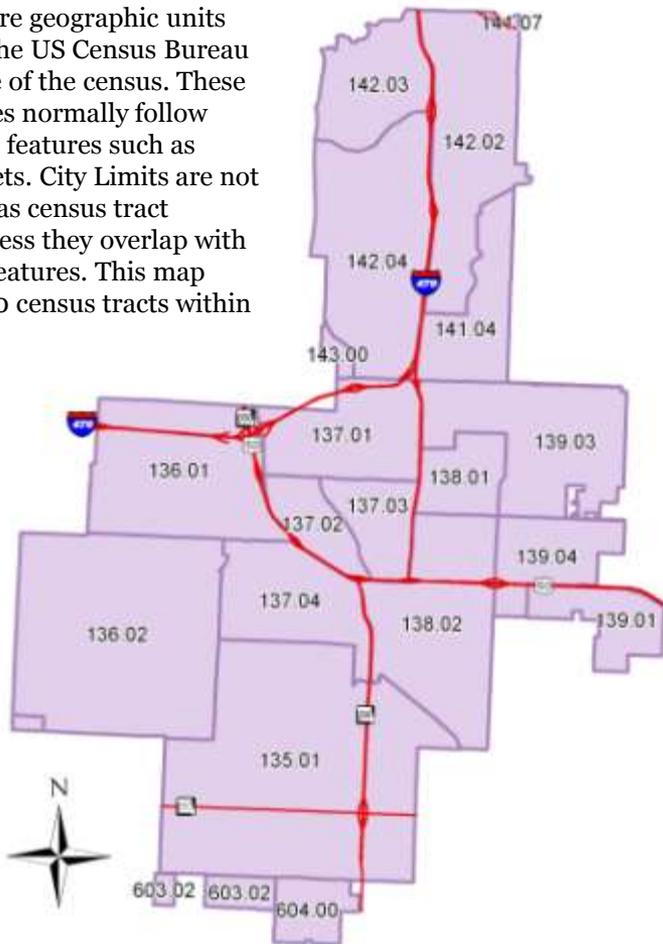

Average Household Size	2.64
Median Age	38.8
Median Household Income	\$71,772
Per Capita Income	\$31,266
Median Value Owner-Occupied Housing Units	\$186,000
Median Rent for Renter-Occupied Housing Units	\$960

Political & Statistical Boundaries

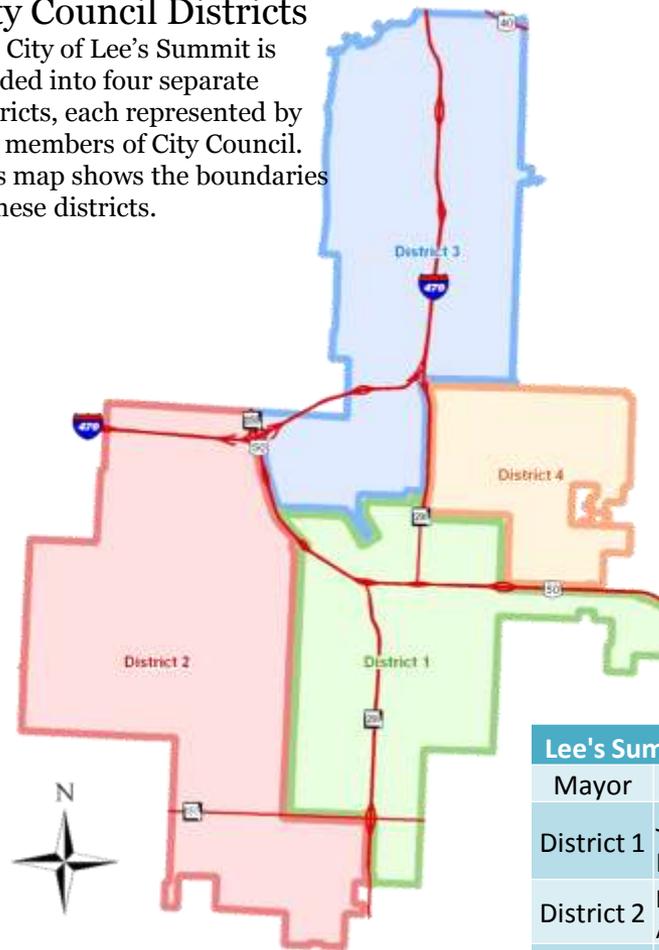

2000 Census Tracts

Census tracts are geographic units delineated by the US Census Bureau for the purpose of the census. These tract boundaries normally follow visible physical features such as rivers and streets. City Limits are not normally used as census tract boundaries unless they overlap with such physical features. This map illustrates 2000 census tracts within the City.

City Council Districts

The City of Lee's Summit is divided into four separate districts, each represented by two members of City Council. This map shows the boundaries of these districts.

Lee's Summit City Council	
Mayor	Karen R. Messerli
District 1	James Hallam Kathy Hofmann
District 2	Randall L. Rhoads Allan S. Gray II
District 3	Joseph Spallo Ed Cockrell
District 4	Bob Johnson Nick Swearngin

School Districts

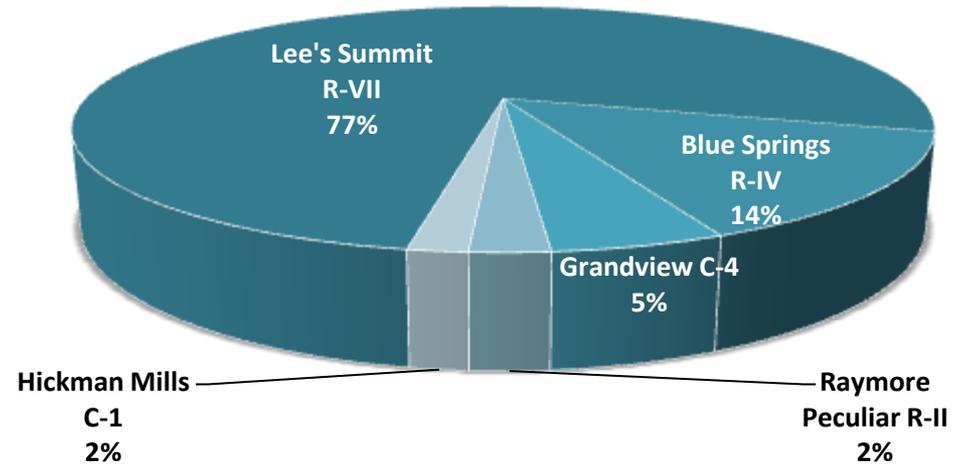

Lee's Summit is generally served by five public school systems. Lee's Summit R-VII School District has the largest service area in Lee's Summit, as shown in the accompanying map and charts here. The table and graph below also summarize the coverage area of each school district within City Limits as well as their relative percentage share.

School District Area within Lee's Summit

School District	Square Miles	Percentage of Total
Lee's Summit R-VII	50	76.55%
Blue Springs R-IV	9	14.11%
Grandview C-4	3	5.18%
Raymore Peculiar R-II	2	2.38%
Hickman Mills C-1	1.17	1.78%
Total	65.37	100.00%

Percentage of School District Area Coverage within Lee's Summit

Annexations and Rezoning

In 2009, one annexation and one rezoning were officially approved by the City Council. The annexation was a response to the property owner's request for a voluntary annexation into the City of Lee's Summit. The Adessa Auto Auction property, located at 101 SW Oldham Pkwy was rezoned from Planned Industrial (PI) to a Planned Mixed Use (PMIX) zoning to better suit future development needs and to ensure the best uses.

Annexation: 2355 SW County Line Rd
 The addition of this 90-acre property immediately south of County Line Road in Cass County is the most recent annexation and brings the total size of the City to 65.39 square miles. The property is currently zoned Agricultural (AG).

Rezoning: Adessa Auto Auction
 Formerly zoned Planned Industrial (PI) accommodating an automobile auction business, this particular property was rezoned in 2009 to Planned Mixed Use (PMIX). Though this property is currently under-utilized, the new zoning was designated to offer better opportunities for the types of development and economic growth suited for this highly visible location. The property lies at the southwest corner of US Highway 50 and M-291, which is ideal for commercial development.

2009 Zoning Statistics

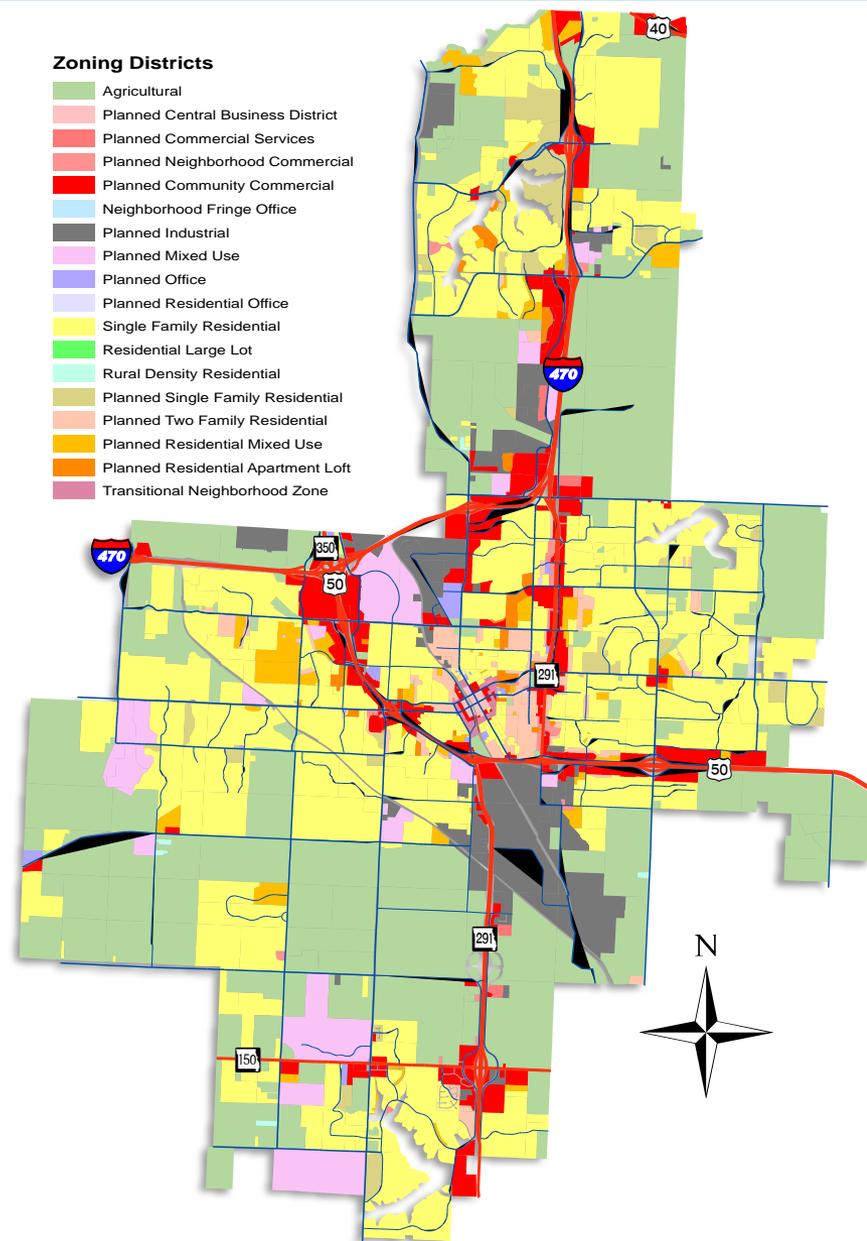

The Lee's Summit zoning ordinance and subdivision regulations, including zoning districts, are established by the City Council through the adoption and amendment of the Unified Development Ordinance (UDO). The provisions of the Unified Development Ordinance are designed to promote:

- A. A strong and positive civic image and identity, based on a high quality living and working environment, an attractive physical setting, safety from fire, flood, crime and other dangers and responsive City services and programs; (Amend. #33)
- B. A living environment that supports the local population, is adaptable to market demands for diverse types and styles of residential living, accommodates future growth, is affordable for all segments of the population, and maintains and improves the overall quality and character of the City;
- C. A system of quality retail and commercial development that provides local residents with needed goods and services and enhances the City's tax base;
- D. Quality employment opportunities for all segments of the population;
- E. A physical relationship between employment opportunities, residential living and goods and services that allow for reduced dependence on the automobile;
- F. A balanced transportation system that provides for safe and efficient movement of vehicles and pedestrians while re-enforcing surrounding land development patterns and that enhances and complements regional transportation facilities;
- G. A park and open space system that satisfies the recreational and leisure needs of local residents, preserves the natural environment and enhances the quality and character of the City;
- H. A balance between the natural and man-made environments that preserves and protects natural features while promoting development and redevelopment;.
- I. The protection and preservation of existing properties and values from adverse or non-harmonious adjacent property uses;
- J. Public facilities and services adequate to meet the needs generated for such facilities and services by development; and
- K. The protection and preservation of historic properties, structures, landmarks and districts.

It is important to note that although Agricultural-zoned land accounts for 41% of the City total, Property Reserve, Inc. (PRI) owns over 4,000 acres of land zoned as such, or roughly 26% of Agriculturally zoned land. Other major uses of Agricultural-zoned land in Lee's Summit are State, County and City parks and natural conservation areas. (See next page for more information about PRI Properties).

Zoning Districts

- Agricultural
- Planned Central Business District
- Planned Commercial Services
- Planned Neighborhood Commercial
- Planned Community Commercial
- Neighborhood Fringe Office
- Planned Industrial
- Planned Mixed Use

Transitional Neighborhood	51	0.1%

Existing Land Use

Existing Land Use

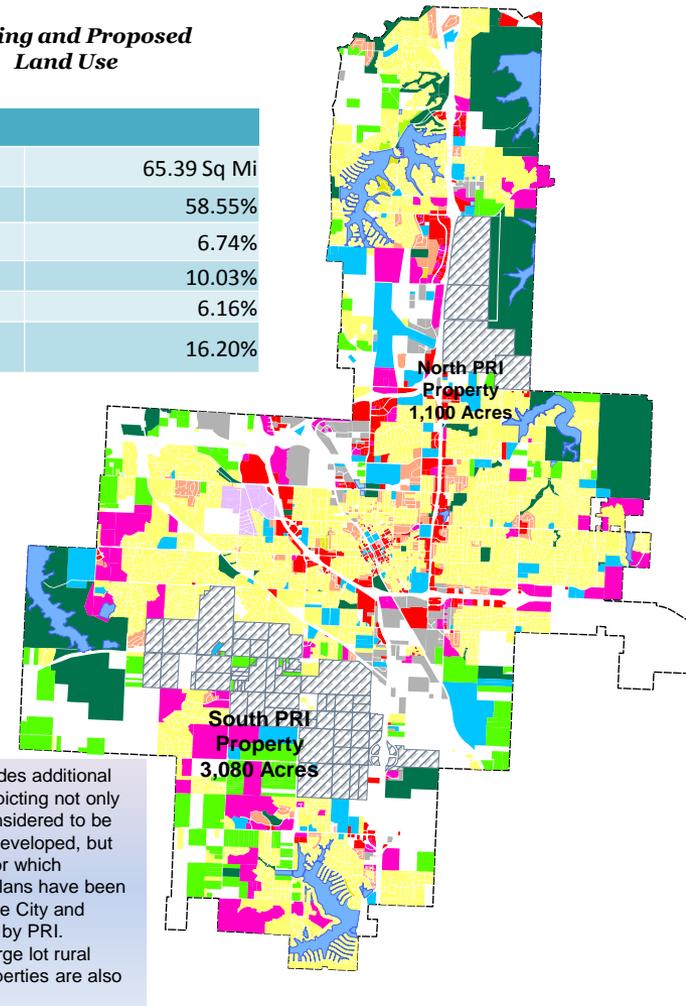

This map identifies parcels considered to be consumed at the time of this report, or more specifically parcels that are so developed or used that no further development is expected within these parcels. Other parcels that, though being used for non agricultural activities, are not identified on this map because they are believed to be further developable due to their size and current usage.

Existing and Proposed Land Use

Land Use Composition	
City Area	65.39 Sq Mi
Consumed Land Area	58.55%
On-Going/Planned Development	6.74%
PRI Properties	10.03%
Large-Lot Residential	6.16%
Undeveloped (Without PRI or Large-Lot Residential)	16.20%

- PRI Property
- Approved/Proposed Plan
- Institutional
- Single Family Residential
- Multi-family Residential
- Commercial
- Industrial
- JKV
- Park/Open Space
- Large-Lot Residential

This map includes additional information depicting not only the parcels considered to be consumed or developed, but also parcels, for which development plans have been approved by the City and parcels owned by PRI. Additionally, large lot rural residential properties are also identified.

Current land use analysis helps us understand our history of community growth. While zoning represents the community's desire for a particular development pattern and types of land uses via means of local regulations and development standards, land use represents what is on the ground. The statistics on this page are derived from calculating parcel sizes by the current land use type based on the following assumptions:

- As long as there is a built structure on site, the parcel is considered built;
- As long as a parcel is final-platted and recorded, it is considered built;
- Large rural residential lots, 5-20 acres in size, with a residential structure are identified separately because they have potential to be further subdivided for future development;
- Large rural parcels are considered undeveloped or vacant.

The map to the right highlights property owned by Property Reserve, Inc. (PRI). Combined, both areas occupy nearly 4,180 acres. This map also includes large-lot residential properties to illustrate future development potential within the city.

Population Growth and Projection

In past decades, Lee's Summit has experienced steady housing growth, however this growth has decelerated considerably in recent years. Since the 2000 Census, the City has estimated a population increase of almost 22,500 over a span of nine years. This table indicates population and percentage growth from 1930 to January 1, 2010.

In April 2010, the U.S. Census Bureau will conduct its decennial census survey to calculate populations throughout the country. This survey will provide an official population counts based on geography. Based on these numbers, population totals may be estimated for the years to follow.

The figures shown for the current year were calculated using 95% of total new dwelling units between July 2008 and June 2009 (to account for vacant units) multiplied by the average household size as given by the 2008 Community Survey provided by the Census Bureau. The average household size fluctuates slightly each year and is currently 2.64 persons per household. In years previous, the average has been between 2.58 to 2.67 persons per Census surveys.

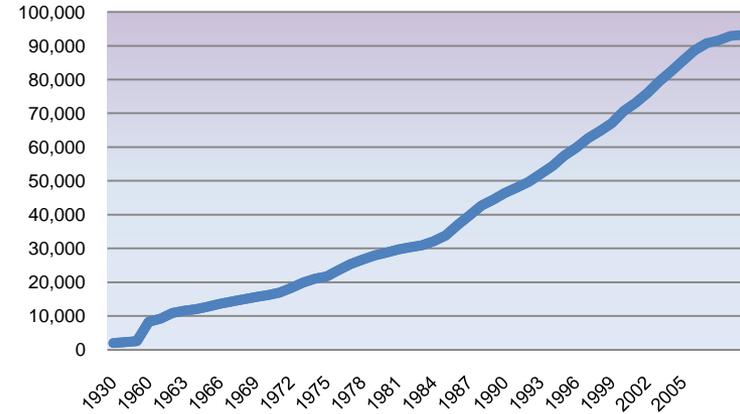

Each year, the City adjusts its population projections for the upcoming decades by closely examining the growth trends. The recent slowdown in growth has prompted a significant cutback of the City's growth projections. At this point, it is unclear how the trend is going to progress. This uncertainty adds to the difficulty in projecting for the future. The projection provided on this page should represent a "best guess".

Lee's Summit Population Growth since 1960

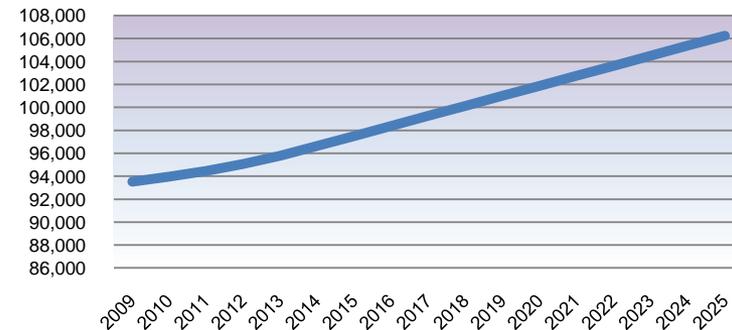

Year	Population	Percentage Growth
1930	2,035	N.A.
1940	2,263	11.20%
1950	2,554	12.86%

2010	93,165	0.26%
Percentage Growth 1930 - 2009		4478.15%

Note: Population as of January 1st except for years ending in "0".

Lee's Summit Population Growth 1930-2009

Lee's Summit Population Growth Projection (Short-term)

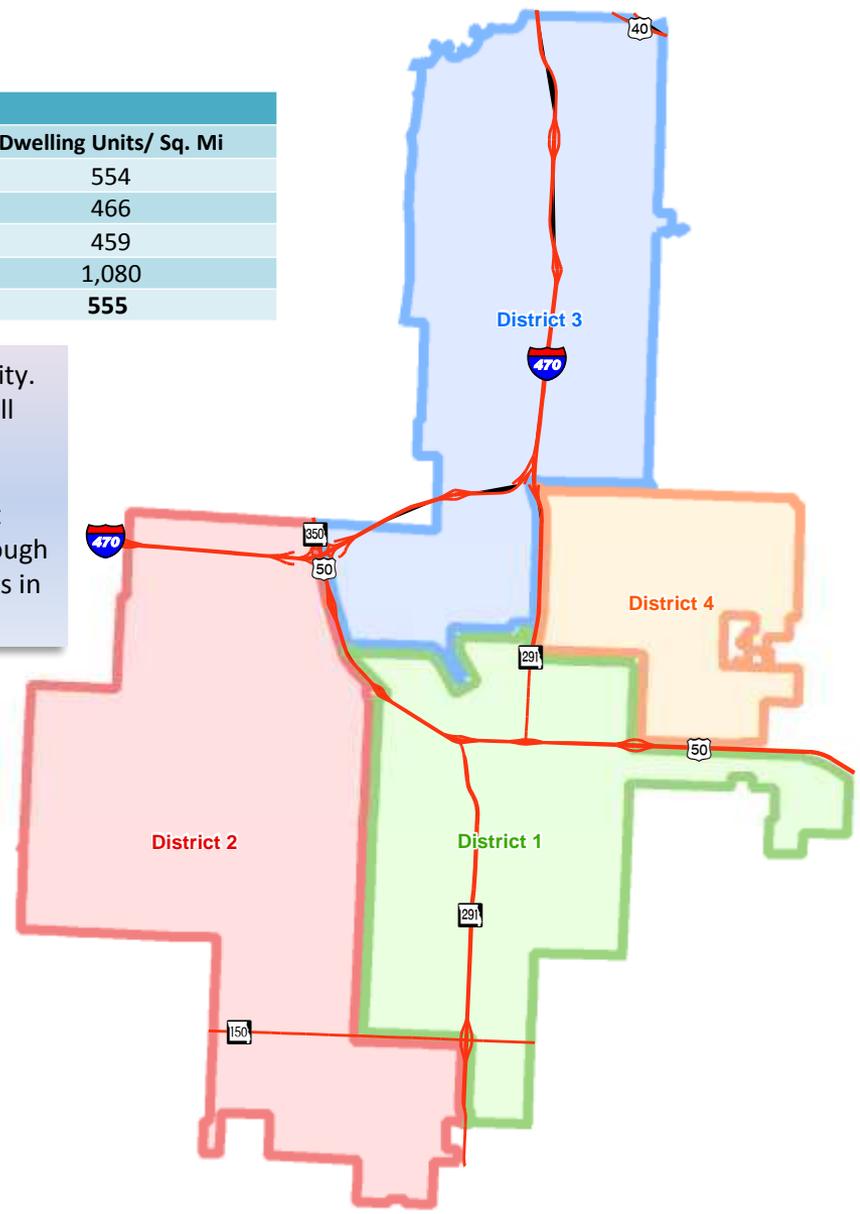

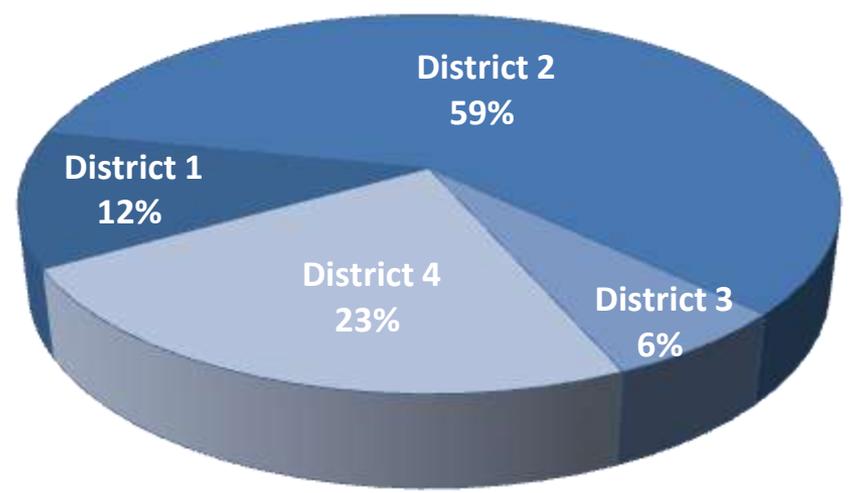

Population by Council District

Population Distribution and Density by Council District

Council District	Population Estimate	Total Sq. Mi	Dwelling Units	Dwelling Units/ Sq. Mi
District 1	21,876	15.38	8,514	554
District 2	27,767	23.21	10,817	466
District 3	22,745	19.31	8,866	459
District 4	20,779	7.49	8,089	1,080
Total	93,165	65.39	36,286	555

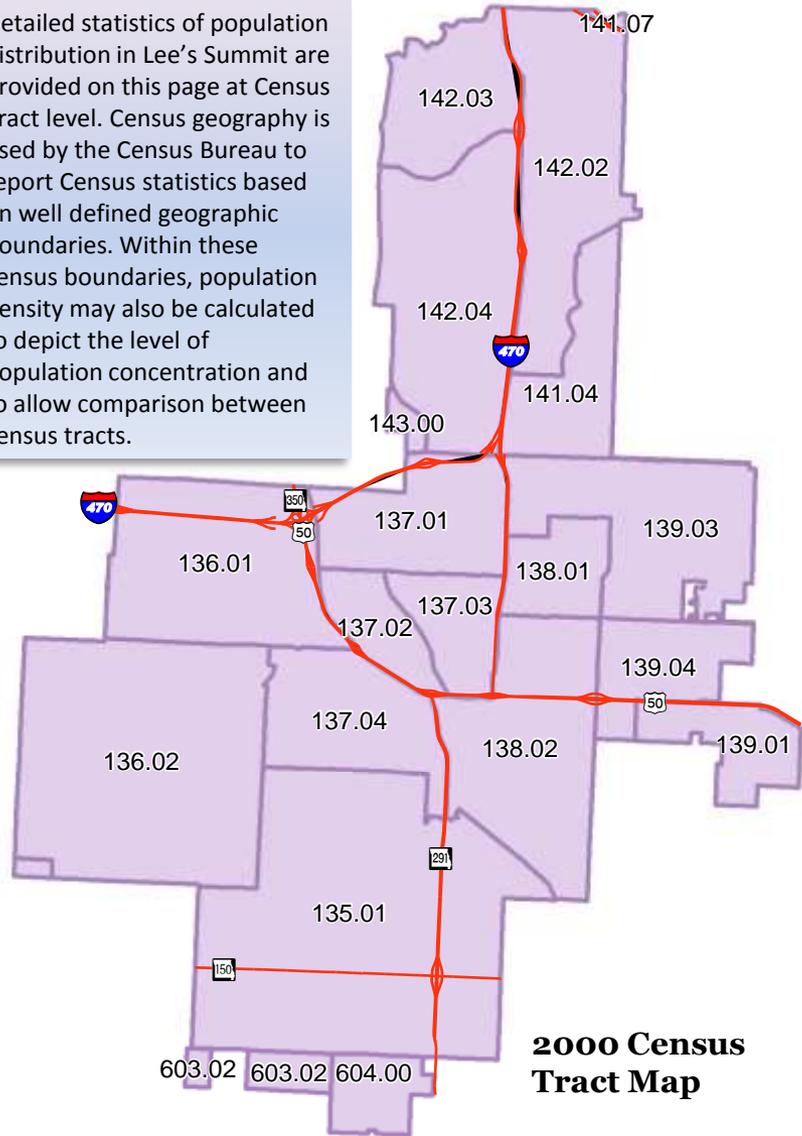

This page provides a breakdown of population by City Council Districts within the City. These figures were calculated using the same formula used to determine the overall population estimate on the previous page. As the chart below illustrates, the most growth occurred in 2009 in District 2, which accounts for more residential development than all other districts combined. Once again, these figures represent growth between July 2008 and June 2009. Residential development continued through the second half of 2009 including a multi-family development with 54 dwelling units in District 3.

2009 Population Growth per Council District

Population Distribution by Census Tract

Detailed statistics of population distribution in Lee's Summit are provided on this page at Census Tract level. Census geography is used by the Census Bureau to report Census statistics based on well defined geographic boundaries. Within these census boundaries, population density may also be calculated to depict the level of population concentration and to allow comparison between census tracts.

Percentage Growth 1960-2008		1194.51%

Lee's Summit has been one of the fastest growing suburban communities in the Midwest for several decades. Since 1960, the City of Lee's Summit has seen exponential growth of nearly 1,200% in housing units built. The steady rate of growth lasted until about three years ago when the housing market collapsed at the national level as well as the local level due to the collapse of the mortgage lending industry. The housing industry is still struggling due to bad economy to this day.

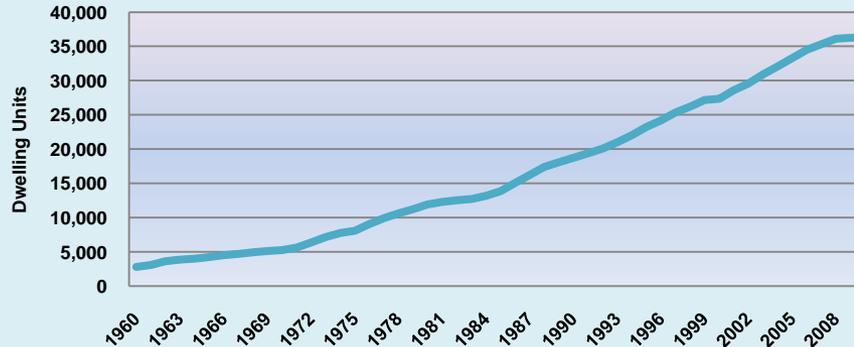

The table to the left provides estimated numbers of housing units in the City's housing stock by year from 1960. The table to the right, on the other hand, provides annual building permit history by residential type. Building permits are issued prior to structures being constructed and occupied, so the number of housing units permitted does not represent the number of housing units added to the existing housing stock.

A dramatic drop in housing permits issued in Lee's Summit is noted between 2007 and 2008. Between 2009 and 2010, the percentage growth set an all-time low for the City, at only 0.25%. As the chart below indicates, the vast majority of residential building permits have been issued for single-family dwelling units.

Lee's Summit Total Building Permits 1960-2009

Lee's Summit Housing Growth 1960-2010

Housing Permits Breakdown by Type of Structure

Although 2009 was a slow year for residential development, Lee's Summit issued more residential building permits than most comparable cities in the Kansas City metro area. It is important to note that 54 of the total number of housing units permitted by the City in 2009 were for a multi-unit senior housing development. The majority of Overland Park's issued permits for 2009 were multi-family as seen in the chart below. Lee's Summit and Overland Park are the only cities in the selected metro cities that issued permits for multi-family development. Lee's Summit has ranked third overall in building permits issued over the past twelve years, behind Overland Park and Olathe.

In general, the recent housing market decline has an adverse effect on the greater Kansas City region and despite these conditions, the housing market in this area appears more resilient than other parts of the country. All data on this page is provided by the Home Builders Association of Greater Kansas City.

Multi-family Residential Building Permits - Metro City Comparison (1998-2009)

Recent Housing Market Conditions

While the trend has continued downward for most cities, the rate of decline is less than recent years, indicating the slowdown might be nearing an end. The chart below illustrates the housing market decline for Lee's Summit and comparable cities in the Kansas City metro area. Lee's Summit is beginning to show signs of slow recovery in residential building permits issued over the course of a year. The graph to the right depicts monthly history of residential building permits issued in 2009. Typically, more permits are issued during summer and fall than during winter and early spring. The huge jump in December is unusual and in this case it was due to a permit for the construction of a 54-unit multi-family senior housing development.

Lee's Summit Total Residential Permits by Year

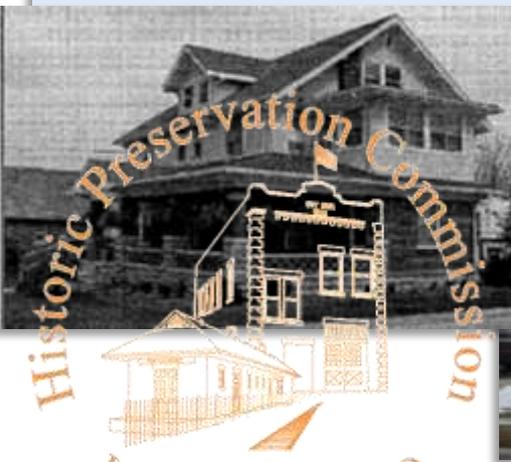

Historic Preservation and Redevelopment

While a growing community, Lee's Summit has a rich history. It is an important task for the community to manage new growth and an equally important task to preserve its history and invaluable historic assets. Lee's Summit Historic Preservation Commission is charged with the tasks of help facilitate the preservation of the community's history. In recent years, the historic downtown has spurred a lot of interest for reinvestment and redevelopment following an unprecedented public improvement project in the downtown. History preservation is becoming more important when redevelopment and reuse of existing buildings that are of history value. In 2009, two redevelopment and reuse projects started.

Arnold Hall (123 SE 3rd St.)

One of the most prominent preservation endeavors for the City is the restoration of historic Arnold Hall on 3rd Street in downtown Lee's Summit. Originally named the Sherwood Manufacturing Company Building, the Hall was constructed in 1946 and donated in 1950 by its owner, Joseph Arnold, to be dedicated as a community center. In recent years, studies have been conducted to explore possible uses for the building, and in 2009 was considered for nomination to the National Register of Historic Places by the Missouri Advisory Council on Historic Preservation. The vision for the redevelopment of the historic landmark is for the space to be remodeled as the first phase of a creative and performing arts campus. This phase would include a large multi-purpose space suitable for live performances, exhibitions and other events as well as a remodeled public concourse and entry to serve as a visual art exhibition space, among other improvements. Restoration efforts will come in partnership between the City and private contributors. The immediate goal is to raise \$4.5 million in private and public funds to refurbish and redesign the building to accommodate the Martin City Melodrama troupe as the primary tenant with the intent of hosting other performance groups, public art shows and community events.

Todd George House (408 SE 3rd St.)

Constructed in 1916 by its namesake, the Todd George House holds historic significance due to it being home to one of Lee's Summit's most celebrated forefathers who paved the way for construction in the City. The house itself, which now sits on a quarter-acre lot, was nominated to the National Register of Historic Places. On November 13, 2009 the nomination was approved by the Missouri Advisory Council on Historic Preservation. Before its nomination, the property was rezoned from Residential to Planned Office district and is currently occupied by a new business tenant. The building is celebrated for its distinct craftsman-styled design symbolic to the time period in which it was constructed.

Major Commercial Development/Redevelopment

Despite the recent economic recession, commercial development continues to occur in Lee's Summit. Perhaps the largest and most obvious development is the ongoing activity at Summit Fair Shopping Center, located at the southeast corner of I-470 and 50 Highway. This past year, Summit Fair hosted its grand opening with two of its anchor tenants: Macy's and JCPenny department stores. Since its opening, the shopping center has added several other tenants and completed thousands of square feet in commercial space. With the Completion of the Blue Parkway overpass scheduled for 2010, access to Summit Fair will open up directly from I-470.

Another Continuation of commercial development is taking place at New Longview, near the western city limits. New Longview is a mixed-use development already offering multi-family residential, office and retail space. Commercial development is planned to continue through the next few years.

Langsford Plaza, depicted to the left, is in its initial phases of construction. Located at the Southwest corner of Langsford and Todd George Rd, this site has two building permits issued in 2009; both of which are retail. Most of the commercial development that took place in 2009 was in fact retail, but also included some office space development in Lakewood Business Park and elsewhere.

Construction at Langsford Plaza.

Completed retail space at Summit Fair.

Clock tower in the heart of the shopping center.

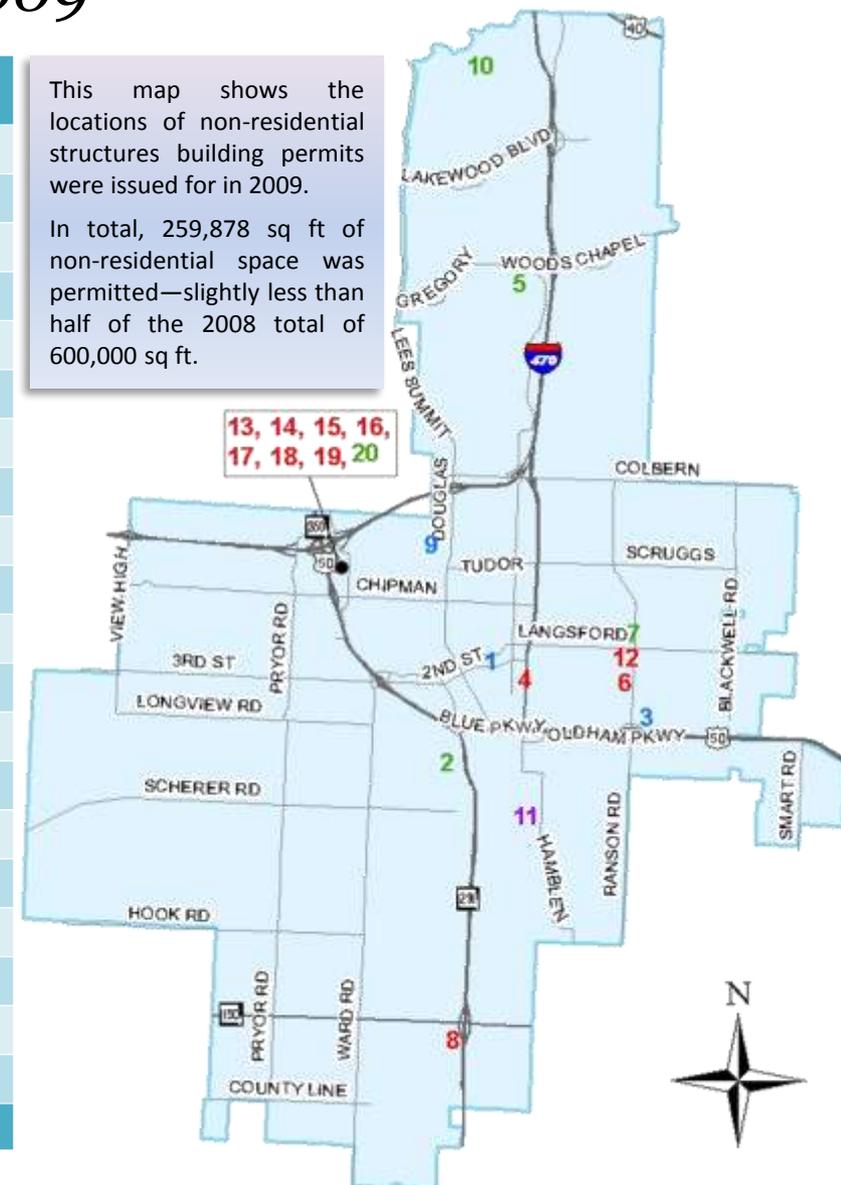

Convenience Store located in Langsford Plaza.

Based on Square footage, the vast majority of non-residential activity was located in Council District 3, due largely in part to Summit Fair. The development of this major shopping center also contributes to the large portion of retail space permitted in 2009. Beyond Summit Fair, most other permits are scattered throughout the city.

Non-Residential Yearly Totals by Land Use

Annual Aggregate Square Footage for Office Retail and Industrial Permits

Annual Total for Office, Retail, and Industrial Permit by Land Use Type

Over the last decade, non-residential development activities have been relatively steady. However, between 2008 and 2009 these activities dropped by nearly 50%. The recent development of a major shopping center has helped bolster these figures since then, and development continues to occur despite recent economic conditions.

For the third straight year, retail has been the strongest sector of non-residential development in Lee's Summit and has stayed relatively consistent over that time period. The land use type that has experienced the greatest decline is the industrial sector. In 2009 industrial only accounted for roughly 50,000 square feet of non-residential building permit activity, compared to 2007, when that figure was above 200,000. The office sector remained fairly steady and continued to develop all over the City.

As discussed earlier, non-residential development has also been impacted by the economic downturn in recent years. The market demand for both existing space and new space has been declining.

As stated in previous development reports, public infrastructure is important to sustaining commercial development. The City of Lee's Summit continues to make these improvements along major corridors where development is expected to occur. Through proactive planning and financing strategies, the City is able to create and sustain conditions, under which this type of development may occur. The following page gives a detailed analysis of the short-term development outlook for the City.

Short-Term Development Outlook

It is anticipated that the impact of the current economic conditions will continue to be felt in the building industry in 2010 and years to come. On the residential side, the City currently has a stock of over 5,000 preliminary platted single family lots yet to be built on, a supply that will take several years to be completely absorbed. It is reasonable to predict that, in the short term, majority of new single family residential construction will be concentrated in these already platted subdivisions, as symbolized in yellow on the map to the right. Multi-family residential, on the other hand, does not have as much of a stock of platted but unbuilt lots in Lee's Summit.

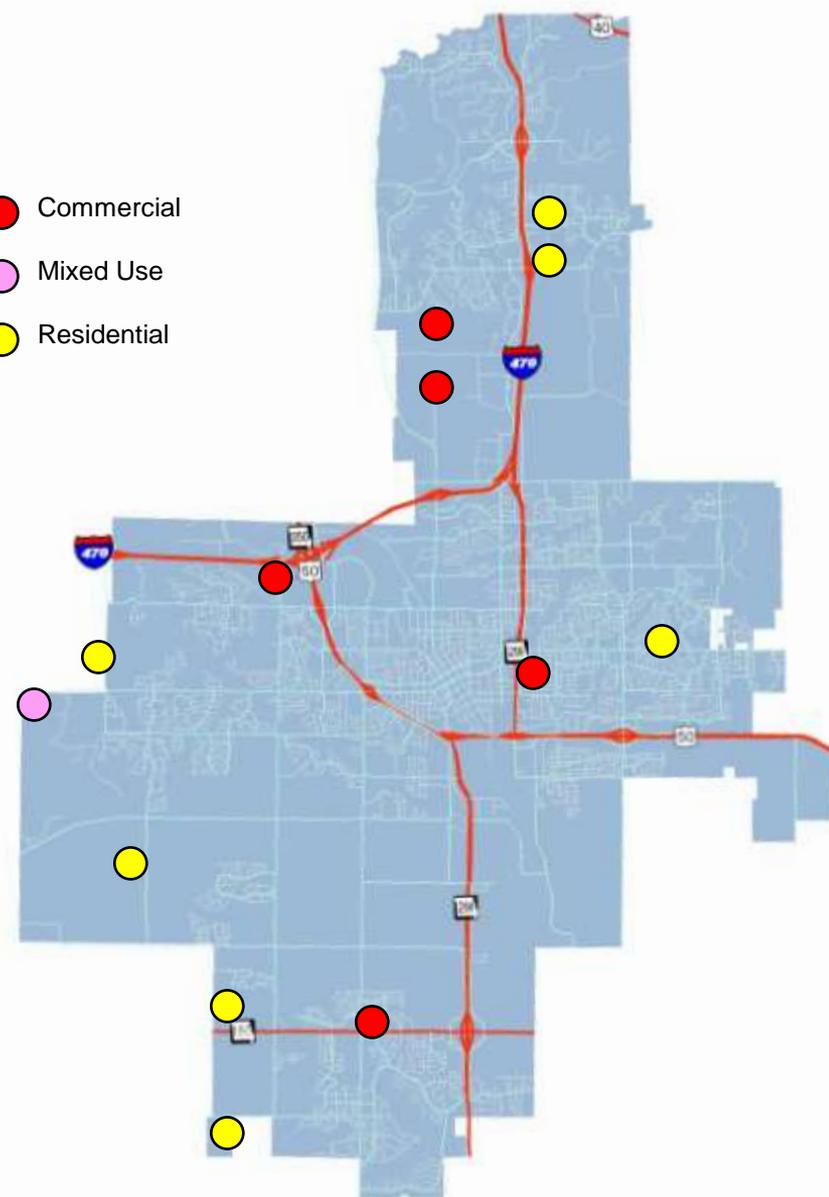

On the commercial side, new construction activities are anticipated to be limited primarily to a few development sites currently being completed, such as Chapel Ridge, I-470 Business Center, Summit Fair, New Longview and Langsford Plaza. Infill and redevelopment interest has been growing in recent months and is expected to continue for years to come.

In response to MODOT's project to widen M-150, in 2010, the City will launch a corridor study for M-150 Highway to assess potential for future development opportunities and to formulate design standards for new development along the corridor. Once the highway improvement is completed, this corridor is expected to be a big draw for new development along the entire stretch.

Other road improvements, such as the interchange at I-470 and Woods Chapel Road widening, are well underway. With the completion of the planned Todd George Road extension north of Colbern Road and realignment of Strother Road, the area between Colbern and Woods Chapel will spur new interest for commercial and industrial development. Improvements such as these are crucial to providing necessary infrastructure to meet the City's development needs.

To identify areas of immediate and short-term development, this map displays the approximate locations of commercial, residential and mixed-use developments throughout the City.

- Commercial
- Mixed Use
- Residential
